## Terms of Admission.

  
.....

Candidates for admission into the Freshman Class are required to write Latin grammatically, and to be well versed in Geography, Arithmetic, six sections in Smyth's Algebra, Cicero's Select Orations, (Folsom's edit. preferred,) the Bucolics, Georgics, and Æneid of Virgil, (the *whole*,) Sallust, (Andrews' edit.,) the Gospels of the Greek Testament, and Jacob's (or Felton's) Greek Reader; together with Latin and Greek Prosody. They must produce certificates of their good moral character. The time for examination is the Friday after Commencement, and the first Thursday in the Fall term. Candidates for admission into the other classes will be examined also in the books which have been studied by the class, into which admission is requested. Students from other Colleges, before they can be examined, must produce a certificate of their regular dismissal. The Geography to be studied may be Morse's, Worcester's, or Woodbridge's. There will be a special examination in Ancient Geography.

N. B. Particular attention to *the writing of Latin* is urged as essential to a suitable preparation for the College Course. The examination *in the Grammar of the Greek and Latin Languages, including the Prosody of both*, and *in writing Latin* will be particular.

Andrews and Stoddard's Latin Grammar and the Greek Grammar of Sophocles are preferred.

## Medical School of Maine.

THE MEDICAL SCHOOL OF MAINE, by an Act of the Legislature, is placed under the superintendence and direction of the Boards of Trustees and Overseers of Bowdoin College. By the joint authority of these two Boards all the degrees of M. D. are conferred.

The Medical Session commences near the middle of Feb., annually, and continues fourteen weeks. Students, and particularly candidates for a degree, are examined either daily or weekly on the subjects of the Lectures.

The Fees for admission to the several courses of Lectures, payable in advance, are \$50.

The Graduation fee, including an engraved Diploma on Parchment, is \$18. Matriculation or Library fee, payable but once, \$3.

Pupils, who have attended two full courses of Medical Lectures, one of which courses must have been at this School, are admitted to all subsequent courses, without payment of any Lecture fees.

Students, who have attended two full courses at other regular Medical Institutions, are required to pay one third of the usual fees for admission to their first course of Lectures at this School, in addition to the Matriculation fee.

### GRADUATION.

Candidates for the Degree of Doctor of Medicine are examined by the Faculty of Medicine immediately after the termination of the Course of Lectures, and also on the second Monday before the annual Commencement of the College, which occurs on the first Wednesday of September.

They must have devoted three years to their professional studies under the direction of a regular Practitioner of Medicine. They must have attended two full courses of Medical Lectures in some incorporated Medical Institution, and the last course previous to examination must have been at this Medical School. They must deposite with the Faculty satisfactory certificates of having pursued their Medical Studies for the required term, and of possessing at the time of examination a good moral character.—They must also pass a satisfactory Examination in Anatomy, Physiology, Surgery, Chemistry, *Materia Medica*, Pharmacy, Obstetrics, and the Theory and Practice of Medicine.—They must read and defend a Thesis or Dissertation on some Medical subject, in the presence of the Faculty of Medicine.

Those Candidates, who have not received a Collegial education, must satisfy the Faculty of their proficiency in the Latin Language and in Natural Philosophy.

Degrees are conferred at the close of each Course of Lectures, and at the annual Commencement of the College in September.

A fair copy of the Thesis or Dissertation must be deposited with the Secretary of the Faculty at least ten days before the commencement of the Examination at the close of the Lectures. These copies are preserved in the Medical Library; and it is required, that they should be written on Letter paper of medium size, with a wide margin, left for the purpose of binding them into volumes.

## LIBRARY.

The Medical Library, attached to this School, is one of the best in the United States. It contains about 3400 vols. principally modern works, which have been selected with much care; and is annually increasing. It embraces an extensive and valuable collection of Plates, among which are the works of Albinus, Baillie, Bateman, the Bells, Breschet, Bright, Carswell, Cloquet, Cooper, Cruveilhier, Home, Hooper, Lizars, Maygrier, Scarpa, Seerig, Swan, Tiedemann, Vicq d'Azyr, Weber, &c. &c.

All the Members of the Medical Class are entitled to borrow two volumes a week from the Library. Those, who are candidates for examination for the degree of M. D. during the year, are permitted to exchange their books twice a week, thus giving them the privilege of consulting four volumes each week.

## ANATOMICAL CABINET.

The Anatomical Cabinet was purchased in Paris; and most of the Preparations were there made under the direction of the late Professor Thillaye.

Many wet preparations have however been added from year to year.— Its valuable specimens of Morbid and Comparative Anatomy are also constantly increasing; so that every department of practical Anatomy can now be fully demonstrated from this collection.

The students, divided into classes containing 3 or 4 individuals, are furnished with the separated bones of the Skeleton for examination at their private rooms.

The Chemical Department embraces every Article of Apparatus essential to a complete illustration of the principles of Chemistry. This Course also includes a very full exhibition of the principles of Common and Galvanic Electricity, Electro-Magnetism, and Magneto-Electricity, with numerous experiments.

Lectures will also be given to the Medical Class on those departments of Natural Philosophy, which are especially connected with Medical Science.

An extensive and valuable collection of Instruments and Apparatus has been provided for the department of Surgery; which will be completed by the Lecturer in this Department. Frequent opportunities for witnessing Surgical operations will be afforded.

All operations in the presence of the Medical Class will be performed *without charge*. It is considered important, that this fact should be extensively made known to the Public.

The foregoing is a brief statement of the means of acquiring Medical Knowledge, which may be enjoyed at this Institution. No efforts will be spared by the Professors which may tend to render these means beneficial, and to promote the instruction of pupils in Medical Science.
