June 7 to 21 . . Examinations — Wednesday to Wednesday of the second week following.

June 21 . . Commencement Exercises of the Medical School — Wednesday, 10 A. M., Church:

*Summer Vacation of Sixteen Weeks.*
BOWDOIN COLLEGE

BOWDOIN COLLEGE was incorporated by the General Court of Massachusetts, upon the joint petition of the Association of Ministers and the Court of Sessions of Cumberland County. The act of incorporation was signed by Governor Samuel Adams, June 24, 1794.

The college was named in honor of James Bowdoin, a grandson of the Huguenot refugee, Pierre Baudouin, who fled from the religious persecution that followed the revocation of the Edict of Nantes, and, in 1687, made a home for himself on the shores of Casco Bay, in what is now the city of Portland. In the next generation the family name was anglicized, and the grandson, James Bowdoin, was born in Boston, which had become the family home, and was graduated from Harvard College in 1745.

He was a stanch and influential supporter of the movement for American independence, a member for many years of the Council, or Senate, of the colonial legislature, a delegate to the first Continental Congress in Philadelphia, president of the Provincial Council, and a close personal friend of Washington. He was also the president of the convention which framed the Constitution of Massachusetts, and was, subsequently, for two terms Governor of the State. In addition to his civil honors he received honorary academic degrees from Harvard, from the University of Pennsylvania, and from the University of Edinburgh; he was a member of various foreign societies, the first president of the American Academy of Arts and Sciences, and a valued friend and correspondent of Benjamin Franklin.

The earliest patron of the college was the Honorable James Bowdoin, son of the Governor. He was graduated from Harvard College in 1771, and subsequently studied at the University of Oxford. In President Jefferson's administration he was appointed successively Minister Plenipotentiary at the Court of Spain, and Associate Minis-
Bowdoin College

ter at the Court of France. During his residence abroad he accumulated a valuable library, a collection of paintings and drawings by old and modern masters, a cabinet of minerals and fossils, together with models of crystallography, all of which he bequeathed to the college. During his lifetime he gave land, money, and apparatus to the college, and at his death it became, by will, his residuary legatee.

Circumstances delayed the opening of the college for several years after its incorporation; but in 1802, a substantial brick building having been erected for its accommodation, the first president was inaugurated, and the work of instruction was begun. The government of the college is vested in two concurrent Boards, the Trustees and the Overseers, and since 1870 one-half the vacancies occurring in the Board of Overseers have been filled from nominations by the body of the alumni.

The Medical School dates from 1820, when it was incorporated by the first legislature of the new State of Maine, and made a department of Bowdoin College.

At the Commencement of 1894 the one hundredth anniversary of the incorporation of the college was celebrated with appropriate exercises, and at that time the academical, medical, and honorary graduates numbered, together, four thousand three hundred and sixty-five; and another thousand was made up of those who had studied in the college without taking a degree, and of those who were undergraduates in that anniversary year.
REGISTER
Trustees

REV. WILLIAM DeWITT HYDE, D.D., LL.D., President, Brunswick.
REV. JOHN SMITH SEWALL, D.D., Vice-President, Bangor.
HON. JOSHUA LAWRENCE CHAMBERLAIN, LL.D., Brunswick.

MUSIC. — Professor Woodruff, Chairman; Professors Burnett and Chapman.

RELATIONS WITH PREPARATORY SCHOOLS. — Mr. McConaughy, Chairman; Assistant Professors Catlin and Nixon.

ADVISORY COMMITTEE ON ATHLETICS. — Professor Whittier, Chairman; Professors Copeland and Hutchins.

EXAMINING. — The Dean, Chairman; Professors Brown, Ham, McIlwain, Mitchell, Moody, Nixon and Woodruff.

ADMINISTRATIVE. — The President, Chairman; The Dean, Professors McIlwain, Mitchell and Whittier.

STUDENT AID. — The President, Chairman; Professors Files and Whittier and Assistant Professor Nixon.

CATALOGUE. — The Dean, Chairman; Professors Burnett and Ham.
ADMISSION TO THE COLLEGE

Subjects in which Examinations are held

Candidates for admission to the Freshman Class are examined in the following subjects:

CHEMISTRY

General chemistry as represented by Remsen’s “Introduction to Chemistry” or some other text-book of similar scope. Candidates must present note-books, certified by their instructors, in which are the results of their own experiments and full notes of processes; and not less than one-half of the time spent upon chemistry must have been given to laboratory work.

ENGLISH

Preparation in English has two main objects: (1) command of correct and clear English, spoken and written; (2) power to read with intelligence and appreciation.

To secure the first end, training in grammar and the simpler principles of rhetoric, and the writing of frequent compositions are essential. The candidate must be able to spell, capitalize, and punctuate correctly. He must show a practical knowledge of the essentials of English grammar, including ordinary grammatical terminology, inflections, syntax, the use of phrases and clauses; a thorough training in the construction of the sentence; and familiarity with the simpler principles governing paragraphs and different kinds of whole compositions, including letter-writing.

To secure the second end, the candidate is required to read the works named below. The list is intended to give the candidate the opportunity of reading, under intelligent direction, a number of important pieces of literature.

Reading and Practice.—The candidate should read the books prescribed below with a view to understanding and enjoying them.
Bowdoin College

will be required to present evidence of a general knowledge of their subject-matter, and to answer simple questions on the lives of their authors. To test the candidate's command of clear and accurate English, he will be required to write brief compositions upon one or more topics drawn from the assigned readings. After 1910 the candidate will also be required to write upon one or more subjects of ordinary experience or knowledge, not taken from the prescribed books. In place of a part or the whole of this test, the candidate may present an exercise book, properly certified by his instructor, containing compositions or other written work done in connection with the reading of the books. The books for this part of the examination will be:

For 1911.—Shakespeare's The Merchant of Venice and Julius Caesar; the Sir Roger de Coverley Papers in the Spectator; Franklin's Autobiography; Scott's The Lady of the Lake and Ivanhoe; Hawthorne's The House of the Seven Gables; Macaulay's Lays of Ancient Rome; Tennyson's Gareth and Lynette, Lancelot and Elaine, and The Passing of Arthur; Dickens's A Tale of Two Cities.

For 1912.—Shakespeare's Julius Caesar and As You Like It; Franklin's Autobiography; Goldsmith's The Deserted Village; Dickens's A Tale of Two Cities; George Eliot's Silas Marner; Irving's Sketch Book; Scott's The Lady of the Lake; Byron's Mazeppa and The Prisoner of Chillon; Macaulay's Lays of Ancient Rome.

The lists for the classes entering in 1911 are selected from the list adopted by the Conference on Uniform Entrance Requirements in English, at a meeting held in Newark, N. J., February 22, 1905. That list may be found in the Bowdoin College Catalogue, 1905-1906 (p. 41), or will be furnished on application to the College. Candidates may make other selections from that list provided that on or before the first day of February preceding the examination they give notice to the Registrar of the College of their intention to present these books.

For classes entering after 1912, the books provided for Reading and Practice are arranged in the following groups, from which ten units—each unit is set off by semicolons—are to be selected, two from each group except that Group I may be wholly omitted: GROUP 1. The Old Testament, comprising at least the chief narrative episodes in Genesis, Exodus, Joshua, Judges, Samuel, Kings, and Dan-
Admission

iel, together with the books of Ruth and Esther; the Odyssey, with the omission, if desired, of Books I, II, III, IV, V, XV, XVI, XVII; the Iliad, with the omission, if desired, of Books XI, XIII, XIV, XV, XVII, XXI; Virgil’s Aeneid. The Odyssey, Iliad, and Aeneid should be read in English translations of recognized literary excellence. For any unit of this group a unit from any other group may be substituted.

GROUP 2. Shakespeare’s The Merchant of Venice; Midsummer Night’s Dream; As You Like It; Twelfth Night; Henry the Fifth; Julius’ Caesar. GROUP 3. Defoe’s Robinson Crusoe, Part I; Goldsmith’s Vicar of Wakefield; either Scott’s Ivanhoe, or Scott’s Quentin Durward; Hawthorne’s The House of the Seven Gables; either Dickens’s David Copperfield, or Dickens’s A Tale of Two Cities; Thackeray’s Henry Esmond; Mrs. Gaskell’s Cranford; George Eliot’s Silas Marner; Stevenson’s Treasure Island. GROUP 4. Bunyan’s The Pilgrim’s Progress, Part I; The Sir Roger de Coverley Papers in the Spectator; Franklin’s Autobiography (condensed); Irving’s Sketch Book, Macaulay’s Essays on Lord Clive and Warren Hastings, Thackeray’s English Humorists; Selections from Lincoln, including at least the two Inaugurals, the speeches in Independence Hall and at Gettysburg, the Last Public Address, and the Letter to Horace Greeley, along with a brief memoir or estimate; Parkman’s Oregon Trail; either Thoreau’s Walden, or Huxley’s Autobiography and selections from Lay Sermons, including the addresses on Improving Natural Knowledge, A Liberal Education, and A Piece of Chalk; Stevenson’s Inland Voyage and Travels with a Donkey. GROUP 5. Palgrave’s Golden Treasury (First Series), Books II and III, with especial attention to Dryden, Collins, Gray, Cowper, and Burns; Gray’s Elegy in a Country Churchyard and Goldsmith’s The Deserted Village; Coleridge’s Ancient Mariner and Lowell’s Vision of Sir Launfal; Scott’s The Lady of the Lake; Byron’s Childe Harold, Canto IV, and Prisoner of Chillon; Palgrave’s Golden Treasury (First Series), Book IV, with especial attention to Wordsworth, Keats, and Shelley; Poe’s Raven, Longfellow’s Courtship of Miles Standish, and Whittier’s Snow Bound; Macaulay’s Lays of Ancient Rome and Arnold’s Sohrab and Rustum; Tennyson’s Gareth and Lynette, Lancelot and Elaine, and The Passing of Arthur; Browning’s Cavalier Tunes, The Lost Leader, How They Brought the Good News from Ghent to Aix, Home Thoughts from Abroad, Home Thoughts from the Sea,
Bowdoin College

Incident of the French Camp, Hervé Riel, Pheidippides, My Last Duchess, Up at a Villa — Down in the City.

*Study and Practice.* — The candidate should read the books prescribed below with the view of acquiring such knowledge of their contents as will enable him to answer specific questions with accuracy and some detail. The examination is not designed, however, to require minute drill in difficulties of verbal expressions, unimportant allusions and technical details.

**For 1911.** — Shakespeare's *Macbeth*; Milton's *Lycidas*, *Comus*, *L'Allegro* and *Il Penseroso*; Burke's Speech on Conciliation with America or Washington's Farewell Address and Webster's First Bunker Hill Oration; Macaulay's Life of Johnson or Carlyle's Essay on Burns.

**For 1912.** — Shakespeare's *Macbeth*; Milton's *Comus*, *L'Allegro* and *Il Penseroso*; or Tennyson's *Gareth* and *Lynette*, *Lancelot* and *Elaine*, and *The Passing of Arthur*; Burke's Speech on Conciliation with America or Washington's Farewell Address and Webster's First Bunker Hill Oration; Macaulay's Life of Johnson or Carlyle's Essay on Burns.

**For 1913.** — Shakespeare's *Macbeth*; Milton's *L'Allegro*, *Il Penseroso*, and *Comus*; either Burke's Speech on Conciliation with America, or both Washington's Farewell Address and Webster's First Bunker Hill Oration; either Macaulay's Life of Johnson, or Carlyle's Essay on Burns.

The examination will be divided into two parts, one of which may be taken as a preliminary, the other as a final. The first part of the examination will be upon the books required for Reading and Practice and may include questions upon grammar and the simpler principles of rhetoric. The second part of the examination will test the candidate's knowledge of the books required for Study and Practice, also his ability to develop a theme through several paragraphs. For 1910 subjects will be drawn from books required for Study and Practice, and after 1910, from these books, from the candidate's other studies, and from his personal knowledge and experience quite apart from reading.

46
Admission

FRENCH

The admission requirements in elementary and advanced French are those recommended by the Modern Language Association of America.

I. ELEMENTARY FRENCH

The first year's work should comprise: (1) careful drill in pronunciation; (2) the rudiments of grammar, including the inflection of the regular and the more common irregular verbs, the plural of nouns, the inflection of adjectives, participles, and pronouns; the use of personal pronouns, common adverbs, prepositions, and conjunctions; order of words in the sentence, and elementary rules of syntax; (3) abundant easy exercises, designed not only to fix in memory the forms and principles of grammar, but also to cultivate readiness in reproducing natural forms of expression; (4) the reading of 100 to 175 duodecimo pages of graduated texts, with constant practice in translating into French easy variations of the sentences read (the teacher giving the English), and in reproducing from memory sentences previously read; (5) writing French from dictation.

The second year's work should comprise: (1) the reading of 250 to 400 pages of easy modern prose in the form of stories, plays, or historical or biographic sketches; (2) constant practice, as in the previous year, in translating into French easy variations upon the texts read; (3) frequent abstracts, sometimes oral and sometimes written, of portions of the text already read; (4) writing French from dictation; (5) continued drill upon the rudiments of grammar, with constant application in the construction of sentences; (6) mastery of the forms and use of pronouns, pronominal adjectives, of all but the rare irregular verb forms, and of the simpler uses of the conditional and subjunctive.

Suitable texts for the second year are: About, Le roi des montagnes; Bruno, Le tour de la France; Daudet's easier short tales; De la Bédollière, La Mère Michel et son chat; Erckmann-Chatrian's stories; Foa, Contes biographiques and Le petit Robinson de Paris; Foncin, Le pays de France; Labiche and Martin, La poudre aux yeux and Le voyage de M. Perrichon; Legouvé and Labiche, La cigale chez les fourmis; Malot, Sans famille; Mairet, La tâche du petit Pierre;
Bowdoin College

Mérimée, *Colomba*; extracts from Michelet; Sarcy, *Le siège de Paris*; Verne’s stories.

II. ADVANCED FRENCH

This should comprise the reading of 400 to 600 pages of French of ordinary difficulty, a portion to be in the dramatic form; constant practice in giving French paraphrases, abstracts or reproductions from memory of selected portions of the matter read; the study of a grammar of moderate completeness; writing from dictation.

Suitable texts are: About’s stories; Augier and Sandeau, *Le gendre de M. Poirier*; Béranger’s poems; Corneille, *Le Cid* and *Horace*; Coppée’s poems; Daudet, *La belle Névéranaise*; La Brète, *Mon oncle et mon curé*; Madame de Sévigné’s letters; Hugo, *Hernani* and *La chute*; Labiche’s plays; Loit, *Pêcheur d’Islande*; Mignet’s historical writings; Molière, *L’avare* and *Le bourgeois gentilhomme*; Racine, *Athalie*, *Andromaque*, and *Esther*; George Sand’s plays and stories, Sandeau, *Mademoiselle de la Seiglière*; Scribe’s plays; Thierry; *Récits des temps mérovingiens*; Thiers, *L’expédition de Bonaparte en Egypte*; Vigny, *La canne de jonc*; Voltaire’s historical writings.

GERMAN

The admission requirements in elementary and advanced German are those recommended by the Modern Language Association of America.

I. ELEMENTARY GERMAN

The first year’s work should comprise: (1) careful drill upon pronunciation; (2) memorizing and frequent repetition of easy colloquial sentences; (3) drill upon the rudiments of grammar, that is, upon the inflection of the articles, of such nouns as belong to the language of everyday life, of adjectives, pronouns, weak verbs, and the more usual strong verbs, also upon the use of the more common prepositions, the simpler uses of the modal auxiliaries, and the elementary rules of syntax and word order; (4) abundant easy exercises designed not only to fix in mind the forms and principles of grammar, but also to cultivate readiness in reproducing natural forms of expression; (5) the reading of 75 to 100 pages of graduated texts from a reader, with constant practice in translating into German easy variations upon sentences selected from the reading lesson (the teacher giving the English), and in reproducing from memory sentences previously read.
Admission

The second year's work should comprise: (1) the reading of 150 to 200 pages of literature in the form of easy stories and plays; (2) accompanying practice, as before, in translating into German easy variations upon the matter read, also in the off-hand reproduction, sometimes orally and sometimes in writing, of the substance of short and easy selected passages; (3) continued drill upon the rudiments of grammar, directed to the end of enabling the pupil, first, to use his knowledge with facility in forming sentences, and secondly, to state his knowledge correctly in the technical language of grammar.

Stories suitable for the elementary course can be selected from the following list; Andersen, Märchen and Bilderbuch ohne Bilder; Arnold, Fritz auf Ferien; Baumbach, Die Nonna and Der Schwiegersonn; Gerstäcker, Gemelshausen; Heyse, L'Arrabbiata, Das Mädchen von Treppi, and Anfang und Ende; Hillern, Höher als die Kirche; Jensen, Die braune Erica; Leander, Träumereien and Kleine Geschichten; Seidel, Märchen; Stökl, Unter dem Christbaum; Storm, Immensee and Geschichten aus der Tonne; Zschokke, Der zerbrochene Krug.

The best shorter plays available are: Benedix, Der Prozess, Der Weiberfeind, and Günstige Vorzeichen; Elz, Er ist nicht eifersüchtig; Wichert, An der Majorsecke; Wilhelmi, Einer muss heiraten. Only one of these plays need be read, and the narrative style should predominate. A good selection of reading matter for the second year would be Andersen, Märchen, or Bilderbuch, or Leander, Träumereien, to the extent of about forty pages. Afterward, such a story as Das kalte Herz, or Der zerbrochene Krug; then Höher als die Kirche, or Immensee; next a good story by Heyse, Baumbach, or Seidel; lastly Der Prozess.

II. ADVANCED GERMAN

The work should comprise, in addition to the elementary course, the reading of about 400 pages of moderately difficult prose and poetry, with constant practice in giving, sometimes orally and sometimes in writing, paraphrases, abstracts, or reproductions from memory of selected portions of the matter read; also grammatical drill upon the less usual strong verbs, the use of articles, cases, auxiliaries
Bowdoin College

of all kinds, tenses and modes (with especial reference to the infinitive and subjunctive), and likewise upon word order and word formation.

Suitable reading matter for the third year can be selected from such works as the following: Ebner-Eschenbach, *Die Freiherren von Gemperlein*; Freytag, *Die Journalisten* and *Bilder aus der deutschen Vergangenheit*, for example *Karl der Grosse, Aus den Kreuzzügen, Doktor Luther, Aus dem Staat Friedrichs des Grossen*; Fouqué, *Undine*; Gerstäcker, *Irrfahrten*; Goethe, *Hermann und Dorothea* and *Iphigenie*; Heine’s poems and *Reisebilder*; Hoffman, *Historische Erzählungen*; Lessing, *Minna von Barnhelm*; Meyer, *Gustav Adolfs Page*; Moser, *Der Bibliothekar*; Riehl, *Novellen*, for example *Burg Neideck, Der Fluch der Schönheit, Der stumme Ratsherr, Das Spielmannskind*; Rosegger, *Waldheimat*; Schiller, *Der Neffe als Onkel, Der Geisterseher, Wilhelm Tell, Die Jungfrau von Orleans, Das Lied von der Glocke, Balladen*; Scheffel, *Der Trompeter von Säkkingen*; Uhland’s poems; Wildenbruch, *Das edle Blut*. A good selection would be: (1) one of Riehl’s novelettes; (2) one of Freytag’s “pictures”; (3) part of *Undine* or *Der Geisterseher*; (4) a short course of reading in lyrics and ballads; (5) a classical play by Schiller, Lessing, or Goethe.

**GREEK**

I. **Elementary Greek.** The examination will be adapted to the proficiency of those who, in addition to the course defined as suitable preparation for the examination in Elementary Latin, have studied Greek in a systematic course of five exercises a week, extending through at least two school years. It will consist of two parts:

(a) The translation at sight of passages of simple Attic prose.

(b) A thorough examination on Xenophon’s “Anabasis,” Book II, directed to testing the candidate’s mastery of the ordinary forms, constructions and idioms of the language; the test to consist, in part, of writing simple Attic prose, involving the use of such words, constructions and idioms only as occur in the portion of Xenophon prescribed.

II. **Advanced Greek.** This examination, which must be preceded by the examination in Elementary Greek, will be adapted to the proficiency of those who, in addition to the course defined as a suit-
Admission

able preparation for the examination in Advanced Latin, have studied Greek in a systematic course of five exercises a week, extending through at least three school years. It will consist of two parts:

(a) The translation at sight of passages of Attic prose and of Homer, with questions on ordinary forms, constructions and idioms, and on prosody.

(b) The translation into Attic prose of a passage of connected English narrative. The passage set for translation will be based on some portion of the Greek prose works usually read in preparation for college, and will be limited to the subject-matter of those works.

The examinations, except as stated in (b) above, will be directed to testing the candidate's knowledge of Greek and his ability to read and understand the language rather than his knowledge of special works which he has studied. It is believed that a course of three years with five exercises a week, covering four books of the Anabasis or their equivalent in Attic prose and 2000 verses of Homer, together with practice in prose composition and sight reading, will give the required proficiency.

HISTORY (INCLUDING HISTORICAL GEOGRAPHY)

I. Greek History. To the death of Alexander, with due reference to Greek life, literature, and art.

II. Roman History. To 800 A.D., with due reference to government and institutions.

III. English History. With special reference to social and political development.

IV. American History. With special attention to the development of institutions and principles of civil government.

The examinations in these subjects will call for comparison of historical characters and periods, for summaries of institutional development, and in general for exercise of judgment as well as memory. A knowledge of historical geography, which will be tested by an outline map, is essential. The amount of collateral reading which has been done by the student will be taken into consideration. In general, all schools are urged to take steps to make their courses conform as far as possible to the recommendations of the Committee of Seven.
I. AMOUNT AND RANGE OF THE READING REQUIRED

1. The Latin reading required of candidates for admission to college, without regard to the prescription of particular authors and works, shall be not less in amount than Caesar, Gallic War, I–IV; Cicero, the speeches against Catiline, for the Manilian Law, and for Archias; Virgil, Aeneid, I–VI.

2. The amount of reading specified above shall be selected by the schools from the following authors and works: Caesar (Gallic War and Civil War) and Nepos (Lives); Cicero (speeches, letters, and De Senectute) and Sallust (Catiline and Jugurthine War); Virgil (Bucolics, Georgics, and Aeneid) and Ovid (Metamorphoses, Fasti, and Tristia).

II. SUBJECTS AND SCOPE OF THE EXAMINATIONS

1. Translation at Sight. Candidates will be examined in translation at sight of both prose and verse. The vocabulary, constructions, and range of ideas of the passages set will be suited to the preparation secured by the reading indicated above.

2. Prescribed Reading. Candidates will be examined also upon the following prescribed reading: Cicero, Speeches for the Manilian Law and for Archias, and Virgil, Aeneid, I, II, and either IV or VI at the option of the candidate, with questions on subject-matter, literary and historical allusions, and prosody. Every paper in which passages from the prescribed reading are set for translation will contain also one or more passages for translation at sight, and candidates must deal satisfactorily with both these parts of the paper, or they will not be given credit for either part.

3. Grammar and Composition. The examinations in grammar and composition will demand thorough knowledge of all regular inflections, all common irregular forms, and the ordinary syntax and vocabulary of the prose authors read in school, with ability to use this knowledge in writing simple Latin prose. The words, constructions, and range of ideas called for in the examinations in composition will be such
Admission

as are common in the reading of the year, or years, covered by the particular examination.

At Bowdoin College the grouping of subjects is as follows:

I. Elementary Latin. The examination will be adapted to the proficiency of those who have studied Latin in a systematic course of five exercises a week, extending through at least three school years. The reading shall be not less in amount than Caesar, Gallic War, I–IV; Cicero, the speeches against Catiline, for the Manilian Law, and for Archias. With the exception of the last two speeches, which are required, it may be selected from the authors specified in I, 2 above.

The examination will cover Cicero’s speeches for the Manilian Law and Archias, sight translation of prose, grammar, and the writing of simple Latin prose.

II. Advanced Latin. This examination, which must be preceded by the examination in elementary Latin, will be adapted to the proficiency of those who have studied Latin in a systematic course of five exercises a week, extending through at least four school years. The reading, in addition to that necessary for elementary Latin, shall be not less in amount than Virgil, Aeneid, I–VI. With the exception of the Aeneid, I, II, and either IV or VI, which are required, it may be selected from the authors specified in I, 2 above.

The examination will cover (a) Aeneid, I, II, and either IV or VI, and sight translation of both prose and poetry; and (b) Latin Composition, the translation into Latin prose of a passage, for which the words, construction, and range of ideas will be such as are common in the reading of the four years’ course.

MATHEMATICS

The present definition of the requirements in Mathematics is in accordance with recommendations made in September, 1903, by a committee of the American Mathematical Society.

I. Elementary Algebra. The four fundamental operations for rational algebraic expressions; factoring, determination of highest common factor and lowest common multiple by factoring; frac-
Bowdoin College

tions, including complex fractions, and ratio and proportion; linear equations, both numerical and literal, containing one or more unknown quantities; problems depending on linear equations; radicals, including the extraction of the square root of polynomials and of numbers; exponents, including the fractional and negative; quadratic equations, both numerical and literal; simple cases of equations with one or more unknown quantities, that can be solved by the methods of linear or quadratic equations; problems depending on quadratic equations; the binomial theorem for positive integral exponents; the formulas for the $n$th term and the sum of the terms of arithmetical and geometric progressions, with applications.

It is assumed that pupils will be required throughout the course to solve numerous problems which involve putting questions into equations. Some of these problems should be chosen from mensuration, from physics, and from commercial life. The use of graphical methods and illustrations, particularly in connection with the solution of equations, is also expected.

II. ADVANCED ALGEBRA. Permutations and combinations, limited to simple cases; complex numbers, with graphical representation of sums and differences; determinants, chiefly of the second, third, and fourth orders, including the use of minors and the solution of linear equations; numerical equations of higher degree, and so much of the theory of equations, with graphical methods, as is necessary for their treatment, including Descartes’s rule of signs and Horner’s method, but not Sturm’s functions or multiple roots.

III. PLANE GEOMETRY. The usual theorems and constructions of good text-books, including the general properties of plane rectilinear figures; the circle and the measurement of angles; similar polygons; areas; regular polygons and the measurement of the circle; the solution of numerous original exercises, including loci problems; applications to the mensuration of lines and plane surfaces.

IV. SOLID GEOMETRY. The usual theorems and constructions of good text-books, including the relations of planes and lines in space; the properties and measurement of prisms, pyramids, cylinders, and cones; the sphere and the spherical triangle; the solution of numer-
Admission

ous original exercises, including loci problems; applications to the mensuration of surfaces and solids.

V. Plane Trigonometry. Definitions and relations of the six trigonometric functions as ratios; circular measurement of angles; proofs of principal formulas, in particular for the sine, cosine, and tangent of the sum and the difference of two angles, of the double angle and the half angle, the product expressions for the sum or the difference of two sines or of two cosines, etc.; the transformation of trigonometric expressions by means of these formulas; solution of trigonometric equations of a simple character; theory and use of logarithms (without the introduction of work involving infinite series); the solution of right and oblique triangles and practical applications.

Physics

Physics as represented by Gage's "Elements of Physics" or other text-book of equal grade. Candidates must be able to solve numerical examples under the various sections; must have performed forty experiments from Hall and Bergen's text-book, and have kept a note-book containing a written description in their own language of their experiments, with all their calculations. These note-books must be certified by their instructors and presented at the examination.

Terms of Admission

The subjects which have been mentioned in the previous pages may be presented in satisfaction of the requirements for admission to the Freshman Class in Bowdoin College under the following conditions. The basis of the system is the work represented by a course pursued five hours per week for a period of thirty-eight weeks. Such a course counts two points.

I. To enter free from condition, a candidate for admission must offer subjects amounting in all to 29 points.

II. The following subjects aggregating 20 points are required:
Bowdoin College

<table>
<thead>
<tr>
<th>Subject</th>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>English</td>
<td>6</td>
</tr>
<tr>
<td>Elementary Latin</td>
<td>6</td>

<td>2</td>
</tr>
<tr>
<td>Roman History</td>
<td>1</td>
</tr>
<tr>
<td>Greek, English or American History</td>
<td>1</td>
</tr>
</tbody>
</table>

Total: 20

III. Subjects amounting to 9 points must be elected from the following list:

- Latin, Advanced: 2
- Greek, Elementary: 4
- Greek, Advanced: 2
- French, Elementary: 4
- French, Advanced: 2
- German, Elementary: 4
- German, Advanced: 2
- Chemistry: 2
- Physics: 2
- Advanced Algebra: 1
- Solid Geometry: 1
- Trigonometry: 1
- Greek History: 1
- American History: 1
- English History: 1

IV. If Elementary Greek is not presented, the candidate for admission must offer either Elementary French or Elementary German.

V. It is strongly recommended that Advanced Latin be presented for admission. If it is not presented, the student is required to take Latin A and B in college.

Methods of Admission

ADMISSION BY EXAMINATION

The regular examinations for admission to college will be held in Banister Hall, in Brunswick, on Thursday, Friday and Saturday, June 22, 23 and 24, 1911, and on Monday, Tuesday and Wednesday, September 25, 26 and 27, 1911. At the examinations in June, attendance is required at 8.30 A.M. on Thursday. At the examinations in September, attendance is required at 8.30 A.M. on Monday. The examinations are chiefly in writing. The schedule for the examinations of either period will be sent on application.
Admission

Examinations at Preparatory Schools. Printed examination papers in certain of the subjects required for admission to college will be furnished to the principal of any high school or academy of good standing, having a regular college preparatory course of not less than three years in length, for the use of such of his students as propose to join the Freshman class at Bowdoin. In exceptional cases, the conduct of the examinations may, on the recommendation of the principal, be entrusted to some other person approved by the Faculty.

The following are the subjects in which papers will be sent: 1, English; 2, Elementary Greek; 3, Advanced Greek; 4, Elementary Latin; 5, Advanced Latin (two papers); 6, Algebra; 7, Plane Geometry; 8, Elementary French; 9, Advanced French; 10, Elementary German; 11, Advanced German; 12, Roman History; 13, Greek History; 14, English History; 15, American History; 16, Chemistry.

In each of the above subjects, except Advanced Latin, one paper is sent. In Advanced Latin there are two papers (a and b), the second of which consists of Latin Composition.

No papers will be sent in Advanced Mathematics, or Physics. The entrance examinations in these subjects can be taken only at Brunswick.

In holding entrance examinations elsewhere than in Brunswick, the following regulations are to be observed:

1. Papers are sent only in June. The dates for holding the examinations this year are June 8, 9 and 10. Under no circumstances can papers be sent at any other dates.

2. Applications for papers, addressed to the Dean, must be received not later than June 5 and should state the name of the school, the subjects in which papers are desired, and the number of students to be examined in each subject.

3. Printed examination papers, together with the requisite number of blue-books, will be sent to the principal by express, prepaid, in time for the examination. On the completion of the examination, the books are to be returned at once by express, at the expense of the college.

4. The examinations are to be conducted by the principal in conformity with a schedule of hours fixed by the college. Copies of the schedule can ordinarily be obtained by May 15, on application to the Dean.

Examinations are also held at Thornton Academy, Saco; at
Bowdoin College

Washington Academy, East Machias; at Fryeburg Academy; and at Lincoln Academy, Newcastle, these schools having been made special fitting schools for the college by the action of their several Boards of Trustees, in concurrence with the Boards of Trustees and Overseers of the college.

The entrance examinations may, if the candidate prefers, be divided between two or more successive years, or between June and September of the same year. In that case a certificate will be given for such subjects as are passed at each examination.

A report of the results of the examinations, whether at Brunswick or elsewhere, is made to the principal, and also to the candidate, within two weeks after Commencement.

ADMISSION BY CERTIFICATE

In place of examinations, certificates will be received from preparatory schools in New England which have been approved by the New England College Entrance Certificate Board. This Board is an association of colleges established for the purpose of receiving, examining, and acting upon all applications of schools in New England which ask for the privilege of certification. The associated colleges are Amherst, Boston University, Bowdoin, Brown, Dartmouth, Mount Holyoke, Smith, Tufts, the University of Maine, the University of Vermont, Wellesley, Wesleyan University, Williams. Certificates are in all cases passed upon by the individual college; but students are received on certificate from such schools only as have been approved by this Board. All schools desiring the certificate privilege should apply before April 1st of each year to the Secretary of the Board, Professor Nathaniel F. Davis, 159 Brown Street, Providence, R. I.

The college has established a list of schools outside New England to which it accords the certificate privilege. Admission to this list can be obtained on presentation of evidence of qualification.

Blank certificates for admission to Bowdoin College may be had by principals on application to the Dean.

The certificates, issued as the result of examinations which are held by the College Entrance Examination Board, will be accepted in so far as they meet the requirements for admission to Bowdoin College.
Required and Elective Studies

ADVANCED STANDING
Candidates for admission to the Sophomore, Junior and Senior classes, who do not present certificates from other colleges, are examined in the studies already pursued by the class which they wish to enter, equivalents being accepted for the books and authors studied by the class. No one is admitted to the Senior Class after the beginning of the second semester. Applications for admission to advanced standing should be addressed to the Dean.

TESTIMONIALS AND CERTIFICATES
Testimonials of good moral character must in all cases be presented before certificates of admission are granted. A testimonial is preferred from the teacher under whom the preparatory course was completed. A student from another college, before he can be admitted, must present a certificate of honorable dismissal.

BOND
A bond for two hundred dollars, with satisfactory sureties, must be filed with the Treasurer by every student on his admission to college, as security for the payment of his term bills and any other charges that may arise under the college laws. A blank form for this purpose will be given with the certificate of admission.

SPECIAL STUDENTS
Persons who give evidence of maturity, earnestness of purpose and adequate preparation will be allowed to pursue special studies in connection with the regular classes, without becoming candidates for the degree of A.B.; but no student shall continue in such special standing for more than two years. Applications for admission as special students should be addressed to the Dean.

Required and Elective Studies

REQUIRED STUDIES
In the Freshman year the following courses are required of all students: English 1, 2; French 1, 2 (or German 1, 2); Hygiene 1 (1st semester); and English 5 (2d semester); Latin A and B for all those who enter without credit in Advanced Latin. In case a student offers both Elementary French and Elementary German for admission, an elective may be substituted in place of the required language.
Bowdoin College

In the Sophomore year, German is required of all students except those who offer either French or German (or both) for admission.

Credits in both Elementary French and Elementary German, obtained either at entrance to college or for college courses, are required for a degree. When no modern language is offered for admission French is ordinarily studied first in college.

In addition, a course in Physical Training is required of all students from December first to April first in each of the four years.

ELECTIVE STUDIES

All other courses, except those mentioned above, are elective, but subject to the following restrictions:

REGULATIONS GOVERNING THE ELECTION OF STUDIES

1. All students, both Regular and Special, are required to take four (4) full courses in each Semester in addition to the required work in Physical Training and Hygiene.

2. All Regular students are required to take a fifth (5) course during any two (2) Semesters after Freshman year.

3. No student is allowed to elect more than one (1) extra course in any semester without the consent of the Dean.

4. No student is allowed to elect courses involving a conflict of hours, except with consent of the Faculty.

5. Each student is required to arrange his course of study in conformity with the following requirements in regard to Major and Minor Subjects.

DEFINITION. A Major is a subject pursued through six (6) courses. A Minor is a subject pursued through four (4) courses.

6. Each Regular student is required to have completed before graduation either

   I. One major and two minor subjects, or

   II. Two major subjects.
Required and Elective Studies

SCHEDULE OF FRESHMAN COURSES

Note. The variety of subjects that may be offered in fulfilment of the requirements for admission necessitates the division of students into three groups, which in the following schedule of courses are designated as follows:

Class I. Candidates for the degree of A.B. who offer Greek for admission.

Class II. Candidates for the degree of A.B. who offer other subjects than Greek for admission.

Class III. Candidates for the degree of A.B. who offer only three years of Latin for admission.

Class I.

(The numeral in parentheses indicates the number of hours per week.)

Required Subjects: Hygiene (1) First Semester, English 5 (1) Second Semester, English 1, 2 (4), and French 1, 2 (3), or German 1, 2 (3).

Elective Subjects: Choose two of the following: Mathematics, 1, 2 (4), Latin 1, 2 (4), Greek 1, 2 (4), History 1, 2 (3).

Class II.

Required Subjects: Hygiene (1) First Semester, English 5 (1) Second Semester, English 1, 2 (4), and German 1, 2 (3), or French 1, 2 (3).

In case a candidate offers both French and German, an elective may be substituted in place of the required language.

Elective Subjects: Choose one from the following: Mathematics, 1, 2 (4), Latin 1, 2 (4); and one of the following: Greek A, B (4), French 3, 4 (3); Physics 1, 2 (3), Latin 1, 2 (4), or Mathematics 1, 2 (4), History 1, 2 (3) under conditions.

Those who elect Physics 1, 2 in Freshman year must also elect Mathematics 1, 2; and those who elect Physics 1, 2 in Sophomore year must have taken Mathematics 1, 2 in the Freshman year.
Bowdoin College

Elective Subjects for those who offer both Elementary and Advanced German for admission: Choose one of the following: Mathematics 1, 2 (4), Latin 1, 2 (4); and one of the following: Greek A, B (4), Physics 1, 2 (3), Latin 1, 2 (4), Mathematics 1, 2 (4), German 3, 4 (3) or 5, 6 (3), or History 1, 2 (3).

Class III.

The required and elective subjects are the same as in Class II except that Latin A and B is required; and if Mathematics is not elected in the Freshman year, Latin 1, 2, must be elected in the Sophomore year.
Courses of Instruction

ASTRONOMY

Mr. Stone

1. Descriptive Astronomy. An introductory course for the general student. First Semester: Tuesday, Thursday, Saturday, 10.30.

For one exercise each week two hours of observatory work are usually substituted. Course 1 is elective for Sophomores, Juniors and Seniors.

2. Spherical and Practical Astronomy. Elements of spherical trigonometry with applications to problems in navigation and surveying; observatory work with sextant, transit and equatorial. Second Semester: Tuesday, Thursday, Saturday, 10.30.

Prerequisite. Astronomy 1, and Mathematics 1, 2.

BIOLOGY

Professor Copeland

ZOOLOGY

1. General Introduction to Zoölogy. Lectures and laboratory work. First Semester: Monday, Wednesday, Friday, 1.30 to 3.30.

The lectures in Courses 1, 2, are designed to give a general introduction to the subject of Zoölogy. The classification, distribution, morphology, physiology, ecology and evolution of animals are discussed. Representative types from the lower groups of animals to the vertebrates are studied in the laboratory. Some exercises in addition are based on animal cytology, histology, embryology and physiology. The exercises involve the use of the microscope, and in Course 2 the student is given practice in dissecting. These courses are intended for beginners, and for those wishing to gain a comprehensive view of the subject. Elective for Sophomores, Juniors and Seniors.
Bowdoin College

Courses 3, 4, deal with the morphology of vertebrates from a comparative standpoint, and illustrate the evolution of animals from the fishes to the mammals. The classification of the chordates, theories of vertebrate structure and the homologies of organs are discussed. A fish, amphibian, reptile, bird and mammal are dissected and studied in the laboratory. These courses are omitted in 1911-1912. Elective for those who have taken or are taking Courses 1, 2.

[5. Microscopical Anatomy. Lectures and laboratory work. First Semester: Monday, Wednesday, Friday, 10.30 to 12.30.]

This course treats of the technique involved in the preparation and study of animal cells and tissues. A series of preparations is made and studied in the laboratory. Elective for those who have taken or are taking Courses 1, 2.

[6. Vertebrate Embryology. Lectures and laboratory work. Second Semester: Monday, Wednesday, Friday, 10.30 to 12.30.]

A course on the earlier stages of development, treating of the reproductive cells, maturation, fertilization, cleavage, the formation of germ layers, the development of the primitive segments and the formation of foetal membranes. A series of preparations illustrating the early development of the chick is made and studied. Elective for those who have taken Course 5.

Courses 3, 4, 5, 6, are intended for those who desire to lay a broad foundation for the study of human morphology and physiology, and for those especially interested in or proposing to teach biology. Some opportunity is offered for a selection of work in accordance with the special requirement of the student. Practice is also given in technical laboratory methods.

7 and 8. Special Laboratory and Field Investigations. First and Second Semester: Six hours a week, at the convenience of instructor and students.

This course offers to students having the requisite training the opportunity of pursuing original biological investigations under the direction of the instructor.
Courses of Instruction

This course includes a discussion of the evidence supporting the doctrine of evolution, and an examination into the theories of species origin. The topics of variation, adaptation, heredity and other problems which arise in connection with evolutionary biology are discussed. Elective for Juniors and Seniors.

BOTANY

1. Botany. Lectures and laboratory work. Second Semester: Monday, Wednesday, Friday, 8.30 to 10.30.

The lectures are intended to give a general survey of botany, and treat principally of the classification, morphology, physiology and ecology of plants. The laboratory work consists of the study of types of the vegetable kingdom from the lower groups to the flowering plants. Some attention is given to plant physiology. The purpose of the course is to give a comprehensive view of the vegetable kingdom, and to present some of the facts and doctrines derived from the scientific study of plants. It is intended for beginners. Elective for Sophomores, Juniors and Seniors.

CHEMISTRY AND MINERALOGY

Assistant Professor Cram; Mr. Evans

CHEMISTRY

1. General Chemistry. Lectures and laboratory work. First Semester: Monday, Wednesday, Friday, 10.30.

Laboratory divisions on the same days at 11.30, 1.30 and 2.30.

2. General Chemistry. Continuation of Course 1. Second Semester: Monday, Wednesday, Friday, 10.30.

Laboratory work as in Course 1.

Assistant Professor Cram

Courses 1, 2, are elective for Sophomores, Juniors and Seniors.

3. Qualitative Analysis. First Semester: Monday, Wednesday, Friday, 2.30.

Elective for those who have passed Courses 1 and 2.
Bowdoin College

ASSISTANT PROFESSOR CRAM

Elective for those who have passed Course 3.

The work is conducted upon an individual basis. Each man is assigned a conference period when he reports the results of work in the laboratory. Five hours of laboratory work are required each week. One lecture is given each week upon some chemical subject, attendance at which is required of all men taking Course 5 or 7. The lectures for 1910-1911 are upon Physical Chemistry and come at 2.30 Thursday. Elective for those who have taken Course 3. Men intending to take this course are advised to elect Physics 1, 2.

6. Continuation of Course 5. Quantitative Analysis, with determinations selected according to the needs and preferences of individuals. Second Semester.

MR. EVANS

Elective for those who have taken Course 5 and in special cases for Seniors who have taken Course 3 but not Course 5.

7 and 8. Preparation of inorganic and organic compounds; water and food analysis; assaying; advanced quantitative analysis; industrial chemistry. Work may be chosen according to individual preferences. Five hours of laboratory work per week and one hour lecture. First and second Semester.

MR. EVANS

Courses 7, 8, are elective for those who have taken Courses 5, 6.
Elective for Seniors who are taking Courses 5, 6.

MINERALOGY

ASSISTANT PROFESSOR CRAM

1. The identification, composition, occurrence, properties and uses of the common minerals and rocks. Lectures and laboratory work. Second Semester: Tuesday, Thursday, Saturday, 8.30.

Elective for Sophomores, Juniors and Seniors who have had Chemistry 1.
Courses of Instruction

ECONOMICS AND SOCIOLOGY
Assistant Professor Catlin

   Elective for Sophomores, Juniors and Seniors.

2. Corporations, Trusts and Railways. A study in business organization as illustrated in these forms of enterprise. Among the topics discussed are: the evolution of the corporation, methods of promotion and financing, classes of securities; problems of railway management, rates, classification, discrimination, pooling and consolidation, governmental policies in the United States and Europe; influence of industrial combinations upon prices and wages, history of typical trusts, legal aspects of trusts. Lectures and text-books. Second Semester: Tuesday, Thursday, Saturday, 9.30.

   Elective for Sophomores, Juniors and Seniors who have had Course 1.

3. Money, Banking and Finance. An introduction to leading principles as exemplified in the currency, credit and financial systems of selected countries, and a study of American problems in these fields. Lectures and recitations. First Semester: Tuesday, Thursday, Saturday, 11.30.

   Elective for Juniors and Seniors who have had Course 1.

4. Commerce and Commercial Policy. Introductory survey of the history of commerce with special reference to the geographical and economic aspects; the theory of international trade; the different commercial policies analyzed and discussed, emphasis being placed upon the tariff history of the United States; customs administration; trade-promoting institutions; ocean transportation. Lectures, reports and collateral readings. Second Semester: Tuesday; Thursday, Saturday, 11.30.

   Elective for Juniors and Seniors who have had Course 1.
Bowdoin College

5. Sociology. Beginning with a study of the biological and psychological bases of human society, this course traces its evolution under the influence of various forces and analyzes social phenomena with a view to arriving at certain laws of progress and noting their bearing upon present social problems. Lectures and recitations. First Semester: Tuesday, Thursday, Saturday, 10.30.

Elective for Juniors and Seniors.

6. The Labor Problem. A study of the rise of the factory system and modern capitalistic production with a critical analysis of the various solutions of the problem, attempted and proposed: trade unionism, socialism, profit-sharing, co-operation, industrial education, labor legislation. Lectures, readings and discussions. Second Semester: Tuesday, Thursday, Saturday, 10.30.

Elective for Juniors and Seniors.

ENGLISH

PROFESSOR MITCHELL; PROFESSOR DAVIS; MR. McCONAUGHY

Courses 1, 2 are required of all Freshmen.
Courses of Instruction

4. Division A. Study of Modern Prose Writing. Required reading from the works of Goldsmith, Burke, Scott, Lamb, Carlyle, Thackeray, Dickens, Ruskin, Emerson, Stevenson. Frequent reports on outside reading. Recitations, lectures, conferences. Second Semester: Tuesday, Thursday, Saturday, 11.30. Professor Davis

Mr. McConaughy

Courses 3, 4, are elective for Seniors, Juniors and Sophomores. Either may be taken without the other. Course 3 is a prerequisite for Course 6.

Course 5 is required of all Freshmen.

Elective for Seniors and Juniors who have credit for Courses 1, 2, 3, 5.

Professor Davis

Four principal disputants are appointed for each debate, and students are required to speak frequently from the floor. The
Bowdoin College

meetings are held in Hubbard Hall on Tuesday evening, 7 to 9.30, and at one other hour each week. Each debate is followed by criticism by the class and by the instructor. Students are given credit in this course for work done in the Bradbury Prize Debates. Elective for those who have taken Course 6.

**ENGLISH LITERATURE**

**PROFESSOR CHAPMAN**

Courses 1, 2, form a consecutive course throughout the year. They are elective for Seniors and Juniors.

3. Early English Literature. Lectures, with special study of Beowulf (in translation), the Vision of Piers Plowman and selections from the Canterbury Tales. First Semester: Tuesday, Thursday, Friday, 1.30.

4. (a) Elizabethan Literature. Select Plays of Shakespeare. (b) Seventeenth Century Authors. Lectures and readings. Second Semester: Tuesday, Thursday, Friday, 1.30.

Courses 3, 4, form a consecutive course, but either course may be taken without the other. They are elective for Seniors.

**FRENCH**

**PROFESSOR JOHNSON; PROFESSOR BROWN**

**PROFESSOR BROWN**

Courses 1, 2, are required of all Freshmen and other first-year students who have not received credit in Elementary French for admission.
Courses of Instruction

Written reports on assigned outside reading are required parts of all courses offered in French Literature.

4. Continuation of Course 3: Prose and Poetry. Second Semester: at the same hours. PROFESSOR JOHNSON

6. Continuation of Course 5. Second Semester: Monday, Wednesday, Friday, 11.30. PROFESSOR BROWN

Courses 3, 4, 5, 6, are open to students who have passed in Courses 1, 2, or who have done equivalent work previous to admission to college. They are parallel courses and may not be taken in successive years.

8. Continuation of Course 7. Second Semester: Three hours a week.]

Courses 7, 8, omitted in 1910-1911. To be given in 1911-1912. PROFESSOR BROWN

In Courses 5, 6, 7, 8 emphasis is laid upon the linguistic side of the work.

12. Continuation of Course 11. Second Semester: Three hours a week.]

Courses 11, 12, omitted in 1910-1911.

Courses 13, 14, are open to Seniors and Juniors.

71.
GEOLOGY

Mr. Alvord

Elective for those who have had or are taking Chemistry 1.

Elective for those who have had Chemistry 1 or its equivalent.

GERMAN

Professor Files; Professor Ham

Professors Files and Ham

Courses 1, 2, are required of Freshmen who offer French for admission, and of all Sophomores who have not previously taken these courses or an equivalent.

Courses of Instruction

4. Prose Composition and Reading. Course 3 continued. Second Semester: Tuesday, Thursday, Saturday, 10.30.

Professor Files

Courses 3, 4, are elective for those students who have taken 1, 2, or an equivalent. The time devoted to class-room work is equally divided between prose composition and reading.

5. Prose and Poetry of the Nineteenth Century. A course in rapid reading selected from the works of Heine, Scheffel, Heyse, Fulda, Baumbach and others. Practice in writing German. First Semester: Monday, Wednesday, Friday, 8.30.

Professor Ham

Courses 3, 4, and 5, 6, are parallel courses and may both be elected together, but not in successive years. They are elective for students who have passed in Courses 1, 2, or an equivalent. Courses 5, 6, involve a large amount of reading in modern German and are designed especially to develop a working vocabulary.

Professor Files

Courses 7, 8, are elective for students who have taken Courses 1, 2 (or equivalent), and 3, 4, or 5, 6. They are intended to give a careful survey of the history of German literature from the earliest times to 1750. The lectures are in German.

9. History of German Literature from the Mid-Eighteenth Century to Goethe's Death. Lectures and collateral reading from selected literary masterpieces. First Semester: Monday, Wednesday, Friday, 11.30.
Bowdoin College

Professor Ham

Courses 9, 10, are elective for students who have passed in Courses 3, 4, or 5, 6.

11. The German Novel in the Nineteenth Century. First Semester: Three hours weekly at the convenience of instructor and class.

12. Continuation of Course 11. Second Semester: Three hours weekly at the convenience of instructor and class.

Professor Ham

Courses 11, 12, are elective for not over five students who have passed in Courses 3, 4, or 5, 6.

13. Seminary Course. An intensive study of some subject selected from the history or the literature of the German nation. For 1910-1911 the topic will be Germany of To-day,—social, industrial and commercial, as interpreted by contemporary writers. For 1911-1912 the subject will be Goethe's Faust; and for 1912-1913, Contemporary German Drama. First Semester: Tuesday, Thursday, 2.30. Second Semester: Tuesday, Thursday, 1.30.

Professor Files

Courses 13, 14, are limited to those students who have had three years of German in college or a complete equivalent, and as a further requirement Courses 7-8, 9-10 or 11-12 in the previous year. The course for 1910-1911 will be conducted mainly in German and demands wide reading from texts, newspapers and periodicals of the day.

15. Gothic. Grammar and reading from the Gothic Bible. First Semester: Two hours at the convenience of instructor and class.

Professor Files

16. Gothic. Analysis of selected passages from the Gothic Bible, Introduction to Old High German,—development of sounds and inflections. Second Semester: Three hours weekly at the convenience of instructor and class.

Professor Ham

Courses 15, 16, are elective for students who have studied German at least three years. They are intended primarily to
Courses of Instruction

furnish an introductory course to the study of Germanic philology, with an especial view to the needs of students who intend to enter upon university work in Germanics.

GREEK

PROFESSOR WOODRUFF

A. White's First Greek Book. First Semester: Monday, Tuesday, Thursday, Friday, 2.30.

B. Xenophon's Anabasis, with exercises in writing Greek; the Iliad and a study of Homeric forms. A continuation of Course A. Second Semester: Monday, Tuesday, Thursday, Friday, 2.30.

Courses A, B, are elective for all who enter college without Greek, and are a preparation for the Freshman courses. They will be omitted whenever there are fewer than three applicants.

1. The Odyssey with written translations and essays, and study of the life and art of the Homeric age; followed by selections from Xenophon (Memorabilia or Cyropaedia) or Herodotus. First Semester: Monday; Tuesday, Thursday, Friday, 1.30.

2. Selections from Xenophon or Herodotus continued; followed by the Gospel of Mark, with study of the life and institutions of Palestine in New Testament times. Second Semester: Monday, Tuesday, Thursday, Friday, 1.30.

Courses 1, 2, are elective for Freshmen, Class I, and all who have completed Courses A, B.

3. Introduction to Dramatic Poetry with study of the origin and development of the Greek drama and the construction and usages of the Greek theatre, together with the reading of several plays of Euripides; in alternation with the Lyric Poets. First Semester: Tuesday, Thursday, Saturday, 10.30.

Courses 3, 4, are elective for students who have taken Courses 1, 2.
Bowdoin College

5. Plato's Apology and Crito, with selected passages from the Phaedo and other dialogues; in alternation with Aeschylus or Aristophanes. First Semester: Three hours, at the convenience of instructor and students.

6. Demosthenes, De Corona, with the history of the development of Greek oratory; in alternation with Thucydides and Lucian. Second Semester: Three hours, at the convenience of instructor and students.

Courses 5, 6, are elective for students who have taken Courses 3, 4. These courses may be elected for two successive years.

7. Greek Literature in English Translation. Lectures and readings, with assignment of selected works for special study and written tests. Group conferences will be held weekly for informal discussion. After a general introduction, including a rapid review of the Epic period, the main work of the course will be in Lyric Poetry and the development of Tragedy from Aeschylus to Euripides. First Semester: Tuesday, Thursday, Saturday, 9.30.

8. Continuation of Course 7. Second Semester: at the same hours. Aristophanes, Thucydides and Plato.

Courses 7, 8, are elective for Seniors and Juniors.

HISTORY AND POLITICAL SCIENCE

PROFESSOR McILWAIN; ASSISTANT PROFESSOR NIXON; ASSISTANT PROFESSOR DUNCALF

HISTORY

2. History of Roman Civilization. Second Semester: Monday, Wednesday, Friday, 1.30. ASSISTANT PROFESSOR NIXON

While this course is introductory to Courses 3, 4, and 5, 6, it is not a prerequisite for them. It is elective for Freshmen. Besides the usual method of instruction by lectures and recitations, conferences will be held weekly for the discussion of assigned readings.

3. History of Europe to the Renaissance. First Semester: Monday, Wednesday, Friday, 1.30.
Courses of Instruction

   Assistant Professor Duncalf  
   Given in 1910-1911.

6. History of Europe since the French Revolution. Second Semester: Monday, Wednesday, Friday, 1.30.]  
   Assistant Professor Duncalf  
   Omitted in 1910-1911.

Courses 3, 4, are given in alternation with Courses 5, 6. They are elective for Sophomores, Juniors and Seniors. Lectures will occupy two of the three hours allotted to these courses. Weekly conferences of an hour for the discussion of assigned readings in selected sources and secondary authorities with small groups of students will be substituted for the third lecture.

   Professor McIlwain  
   Assistant Professor Duncalf  
   Emphasis will be placed on the methods and organs of British colonial control, on the causes of the American Revolution, and on the development of the Constitution.

   Professor McIlwain; Assistant Professor Duncalf  
   Given in 1910-1911, and in 1911-1912.

   Professor McIlwain  
   Omitted in 1910-1911, and in 1911-1912.
   The constitutional and political development will be emphasized.  
   Courses 7 and 8 form a consecutive course throughout the
Bowdoin College

year, as do also Courses 9 and 10. The four are elective for Juniors and Seniors. Beginning with 1911-1912, Courses 7, 8, will be given in alternation with Courses 9, 10.

POLITICAL SCIENCE

Professor McIlwain

Courses 1 and 2 form a consecutive course throughout the year. They are elective for Juniors and Seniors. Lectures will occupy two of the three hours allotted to these courses. Weekly conferences of an hour for the discussion of assigned readings with small groups of students will be substituted for the third lecture.

HYGIENE AND PHYSICAL TRAINING

Professor Whittier

HYGIENE

Lectures on Human Anatomy, Physiology and Personal Hygiene. First Semester: Thursday, 8.30.

Required of Freshmen.

Each student receives a thorough medical and physical examination. From the measurements and strength tests taken a chart is made out for each student, showing his size, strength and symmetry in comparison with the normal standard, and also what parts of the body are defective either in strength or development. At the same time the student receives a hand-book containing the exercises prescribed for the purpose of correcting the physical defects shown by his chart, with specific directions in regard to diet and bathing.
Courses of Instruction

PHYSICAL TRAINING

1. Class exercises: military drill, setting-up drill and Indian-club swinging. Squad exercises (graded to suit the strength of each squad): indoor athletics, chest weights and heavy gymnastics. December to April: Monday, Wednesday, Thursday, 11.30.

Required of Freshmen.

Required of Sophomores.

3. Class exercises: fencing with single-sticks and with broad swords. Squad exercise: indoor athletics. December to April: Tuesday, Thursday, 4.30; Friday, 3.30.

Required of Juniors.

Required of Seniors.

ITALIAN

PROFESSOR BROWN

[1. Elementary Course. Grammar, composition and reading. First Semester: three hours a week.]

[2. Continuation of Course 1. Selections from the prose and poetry of the eighteenth and nineteenth centuries. Second Semester: three hours a week.]

Omitted in 1910–1911. To be given in 1911–1912.

3. Dante, Petrarch and Boccaccio. Selections from the Divine Comedy, the Sonnets and the Decameron. First Semester: three hours a week.

4. Continuation of Course 3. Second Semester: three hours a week.
LATIN

Professor Sills; Assistant Professor Nixon

A. Selections from Cicero's Letters and from Ovid's Metamorphoses. One hour weekly will be devoted to Latin prose composition. First Semester: Monday, Tuesday, Wednesday, Friday, 9.30.

B. Selections from Virgil's Aeneid. Second Semester: at the same hours.

Assistant Professor Nixon

Required of all students entering without credit for Advanced Latin.

Elective for Freshmen.

2. Introduction to Latin Poetry and Drama. Horace, Selected Odes; Terence, one play; Plautus, one play. Second Semester: at the same hours.

Professor Sills and Assistant Professor Nixon

Elective for Freshmen.

Prerequisite, except in special cases, Course 1.

Elective for Sophomores.

Prerequisite, Courses 1, 2.

[3a. General View of Latin Literature from the Origins to Ovid. First Semester: at the same hours.]

Omitted in 1910-1911; to be given in 1911-1912.

Assistant Professor Nixon

Elective for Sophomores.

Prerequisite, Courses 1, 2, 3.
Courses of Instruction

[4 a. General View of Latin Literature from Ovid to Claudian. Second Semester: three hours a week.]

Omitted in 1910-1911; to be given in 1911-1912.

5. Latin Prose of the Empire. Selected readings from Petronius, L. Annaeus Seneca, Quintilian, Apuleius and Minucius Felix. Discussions upon subjects connected with the readings: Roman social life, philosophy, education, literary criticism, origin of the novel, the early Christians. First Semester: two hours a week.

ASSISTANT PROFESSOR NIXON

Elective for Juniors and Seniors.
Prerequisite, four courses in Latin.

[5. Alternate courses, omitted in 1910-1911. a. The Latin Lyric, especially Catullus. b. Latin Tragedy.]

PROFESSOR SILLS

Elective for Juniors and Seniors.
Prerequisite, four courses in Latin.

[6 a. Lucretius: De Rerum Natura; and Virgil: The Georgics.]

PROFESSOR SILLS

Omitted in 1910-1911.

7. Virgil. The Aeneid will be read entire; and the lectures will discuss Virgil as an epic poet and Virgil's literary influence in modern literature. Lectures, reports and translations of assigned passages. Second Semester: Monday, Wednesday, Friday, 11.30.

PROFESSOR SILLS

Elective for Seniors, Juniors and Sophomores.
No previous course in Latin is required.

[8. Latin Influence in English Literature. The character and quality of English Literature as affected by the influence of the classics; and the study of the Latin heritage of the principal English poets. Lectures, reports and outside readings in Latin and English. Second Semester: Monday, Wednesday, Friday, 11.30.]

PROFESSOR SILLS

Omitted in 1910-1911; to be given in 1911-1912.
Bowdoin College

MATHEMATICS

Professor Moody; Mr. Stone

1. Algebra and Solid Geometry. Graphic algebra, including a review of portions of the preparatory work; complex numbers; selected topics from series and limits, indeterminate equations, undetermined coefficients, binomial theorem, elements of the theory of logarithms, choice, determinants and higher equations. This portion of the work closes before the holiday vacation, and the remainder of the Semester is given to solid geometry with mensuration and original theorems. First Semester: Monday, Tuesday, Wednesday, Friday. Div. A, 9.30; Div. B, 8.30; Div. C, 1.30.

2. Solid Geometry and Trigonometry. Solid Geometry completed: trigonometry of the right triangle; practice with four-place tables in solving examples from algebra and geometry and simple problems of heights and distances. Demonstration of fundamental formulas for all angles, and proof of exercises drawn therefrom; the theory and use of six-place logarithmic tables; the solution of oblique triangles, with problems and applications. Second Semester: Monday, Tuesday, Wednesday, Friday. Div. A, 9.30; Div. B, 8.30; Div. C, 1.30.

Professor Moody; Mr. Stone

Courses 1, 2 are elective under certain conditions for all Freshmen except those who pass in these subjects at the entrance examinations.

1 a. First term’s work of Mathematics 9.

1 b. Conic Sections. Elementary geometric theorems and constructions. Three hours per week at the convenience of the instructor from January to end of the First Semester.

2 b. Mensuration. Logarithmic computations for plane and solid figures. Three hours per week at the convenience of the instructor during the first four weeks of the Second Semester.

Professor Moody

These courses are required of students taking Courses 1, 2, who have used for admission the one point allowed respectively in advanced algebra or in solid geometry. They are elective for students who have completed in their preparatory work a satisfactory course in the corresponding subject.
Courses of Instruction

Professor Moody

Courses 3, 4 are elective for those who have taken Courses 1, 2, or an equivalent.

Courses 5, 6 form a consecutive course throughout the year, and are given in alternation with Courses 7, 8. They are elective for those who have taken Courses 1 to 4 inclusive, or their equivalents.

[9 and 10. Advanced Algebra. Determinants, theory of equations continued from Course 1, and selected topics. Three hours, at the convenience of instructor and students.] Omitted in 1909-1910.

Intended for students who wish a further knowledge of algebra, but do not intend to take the more advanced courses in Mathematics. Elective for those who have completed Courses 1, 2.

11 and 12. Elementary Analytic Mechanics. First and Second Semesters: three hours at the convenience of instructor and students.

Prerequisite, Mathematics 3, 4.

PHILOSOPHY AND PSYCHOLOGY

President Hyde; Professor Burnett

PHILOSOPHY

1. Introduction to Philosophy. The problems of Philosophy will be taken up as they have been presented in the statements of modern
Bowdoin College

philosophers from Descartes to Hegel. First Semester: Monday, Wednesday, Friday, 8.30.

President Hyde

Courses 1, 2 are elective for Juniors and Seniors.

4. Continuation of Course 3. Second Semester: at the same hours.

Professor Burnett

These courses aim at the intensive study of a particular philosophical system and the application of its method in the attempted solution of the problems arising in a philosophical survey of the universe. The work of some important idealistic philosopher is used as a text and discussed in detail. Prerequisite, Courses 1, 2, or their equivalent.

Courses 3, 4 will be offered once in two years, being given in 1912-1913.

PSYCHOLOGY

Professor Burnett

2. Continuation of Course 1. Second Semester: at the same hours.

The aim of these courses is to acquaint the student with the facts and the laws of the mind. Emphasis is laid upon those topics which are most intimately connected with the practical life, and a knowledge of which is highly important for a man of liberal education. The subject-matter is treated from the point of view of natural science. Where possible, class-demonstrations are employed. A part of the time is devoted to experimental work. Elective for Sophomores, Juniors and Seniors.

This course deals with the special mental phenomena occurring in men because they are members of a social group. Prerequisite, Courses 1, 2.
Courses of Instruction

This course considers the abnormal facts of mental life, such as insanity, hypnotism, multiple personality.
Prerequisite, Courses 1, 2.

5. Practice Course in Experimental Psychology. First Semester: two laboratory periods of three hours each, at the convenience of instructor and students.

The object of this course is training in methods of investigation, in the discovery and reliance upon evidence, with special reference to the particular application to the science of psychology. To this end the experiments of pioneer investigators are repeated, and some of the problems of the special senses, of apperception, association, feeling, volition, attention, are worked over in their wake.
Prerequisite, Courses 1, 2.

A few students are admitted from Course 5 to assist the instructor in the conduct of original investigations. The hours are determined by consultation. Under certain circumstances this work may be continued for another year.

Courses 5, 6 will be given once in two years, being offered in 1911-12.

PHYSICS

Professor Hutchins

Courses 1, 2 are designed for beginners, and are open to all students who have had or who are taking Mathematics 1, 2.

85
Bowdoin College

Courses 3, 4, 5, 6 comprise two years’ work in the subject of General Physics. They are designed to meet the requirements of students who are preparing to teach in secondary schools, or who are intending to pursue further work in graduate or technical schools. The work in these courses is largely experimental. Precision instruments are used and tested, and results are required from the use of apparatus constructed wholly or in part by the student. Courses 3, 4 are given in alternation with 5, 6. They are elective for all who have taken Courses 1, 2 or their equivalent.

SPANISH

Professor Brown

[1. Grammar, composition and reading. First Semester: three hours a week.]

[2. Continuation of Course 1. Reading of modern prose. Second Semester: three hours a week.]

The courses in Spanish may be counted towards the degree of A.B. only when both are elected in the same year. They are elective for Juniors and Seniors, and, with the consent of the instructor, for Sophomores. Omitted in 1910–1911. To be given in 1912–1913.

SURVEYING AND DRAWING

Mr. Alvord

Drawing

1. Descriptive Geometry and Mechanical Drawing. Descriptive Geometry with applications. Mechanical drawing, lettering
Courses of Instruction

and dimensioning. First Semester: Tuesday, Thursday, 1.30 to 4.00.

Elective for those who have completed Mathematics 1, 2.

2. Continuation of Course 1. Second Semester: at the same hours.

SURVEYING

Elective for those who have completed or are taking Drawing 1, 2.

2. Continuation of Course 1. Second Semester: at the same hours.

COURSES IN THE MEDICAL SCHOOL

By vote of the Faculty, the work in Anatomy, Physiology and Chemistry, in the first year of the course in the Medical School, is accepted in place of the required four courses of Senior year in the Academic Department.

Students intending to avail themselves of this privilege are required to register in the Academic Department at the opening of the college year. They will then be excused from further attendance until the opening of the Medical School.

SPECIAL COURSE OF ONE YEAR IN PREPARATION FOR THE MEDICAL SCHOOL

Beginning with the fall of 1910, there shall be a course of one year, not leading to the Degree of A.B., for students preparing for medical study.

ADMISSION

1. The entrance requirements are the same as for the academic course.

2. Students entering are required to make affirmation of their purpose to pursue their medical studies after completing the course in college, with a statement from parent or guardian to that effect, and
Bowdoin College

with the understanding that change to regular standing will be made only by special vote of the Faculty.

**REQUIRED STUDIES**

Students in this course are required to take:

English I, 2; Hygiene; English 5; Chemistry 1, 2, or 3, 4; Zoölogy 1, 2.

One elective may be chosen from Physics, French and German.

**TRANSFER TO REGULAR STANDING**

Students who have pursued this course will be allowed to take regular standing only by special vote of the Faculty.
Lectures

The Annie Talbot Cole Lectureship: This lectureship was founded by Mrs. Calista Mayhew, of South Orange, N. J., in memory of her niece, Mrs. Samuel Valentine Cole, of Norton, Mass. The incumbent, appointed for one year, gives a series of lectures before the college. These lectures are open to the public. According to the provision of the donor, this lectureship is to "aim at contributing to the ennoblement and enrichment of life by standing for the idea that life is a glad opportunity. It shall, therefore, exhibit and endeavor to make attractive the highest ideals of character and conduct, and also, in so far as possible, foster an appreciation of the beautiful as revealed through nature, poetry, music and the fine arts."

Lectures on Art: Prior to the Thanksgiving recess, the curator of the Walker Art Building, Professor Johnson, gives annually a series of conferences on the Art Building and its contents as illustrating the history of art.
Administration of the College

DEGREES

The degree of Bachelor of Arts is conferred by the Boards of Trustees and Overseers, on recommendation of the Faculty, upon those students in regular standing who have duly completed the academic course prescribed by the regulations of the college.

The degree of Master of Arts is conferred upon those graduates of the college who, after taking the Bachelor's degree, complete an approved course of advanced study. The requirements for the degree of Master of Arts consist of a full year's residence devoted to such advanced study under the guidance of one or more members of the college Faculty, and a written and oral examination at the completion of this work.

BOARD OF PROCTORS

The Dean, Chairman

Walter Nelson Emerson
Ernest Gibson Fifield
Lawrence McFarland

Philip Weston Meserve
Stanley Woodward Pierce
Edward Warren Skelton

ATHLETIC COUNCIL

The regulation of the athletic interests of the college is accomplished by the Athletic Council of the general Athletic Association of Bowdoin College. It consists of twelve members, two of whom are chosen from the Faculty of the college, and five each from the alumni and student bodies. The members for the year 1910–1911 are as follows:

Alumni
Charles Taylor Hawes, Chairman
Franklin Conant Payson
Barrett Potter
Henry Asa Wing
Roland William Mann

Students
Earl Baldwin Smith (1911)
Harrison Leonard Robinson (1911)
Frank Arthur Smith (1912)
John Lawrence Hurley (1912)
George Lincoln Skolfield, Jr. (1913)
Administration of the College

Faculty
Professor Charles Clifford Hutchins
Professor Frank Nathaniel Whittier

RELIGIOUS EXERCISES

Prayers are held each morning except Sunday in King Chapel, and a vesper service is held on Sunday. All students are required to be present. From time to time during the year prominent clergymen of various denominations come to Brunswick as Bowdoin College preachers. They occupy the pulpit of the First Parish Church in the morning and speak in the College Chapel in the afternoon.

THE CHRISTIAN ASSOCIATION

The Christian Association is an un-denominational student organization, membership in which is open to every undergraduate. This year nearly ninety per cent of the students are enrolled as members.

The Y. M. C. A. stands definitely for a life governed by the principles of Christ as interpreted to meet the actual needs of college men. Membership includes the agreement to support the Association financially, attend the meetings and aid in its various activities.

The Association conducts many lines of work. The weekly meetings are addressed by prominent ministers and laymen from out of town, and members of the Faculty and Alumni. A series of addresses is given upon some practical subject, such as "Opportunities for Service in the Professions," or "Christianity and the Social Problems." Each College Preacher holds a brief questionnaire in the Association rooms on the Sunday evening of his visit.

The students meet in informal groups for Bible and Mission study. The leaders of these groups are trained in normal classes which are conducted by members of the Faculty.

The Association partially supports, as the Bowdoin Missionary in India, A. S. Hiwale, of the Class of 1909. The social service activities include a Boys' Club in a near-by town, a Text-book Loan Library for needy students, and an Employment Bureau conducted by the General Secretary.
Bowdoin College

The Association has the services of a General Secretary whose office is in Hubbard Hall. All students are welcome to consult him about any matter in which he can be of service.

TERMS AND VACATIONS

The Academic Year is divided into two semesters, or terms, of equal length. Commencement Day is the fourth Thursday of June. The Summer Vacation of thirteen weeks follows Commencement Day. There are two periods of vacation during the year: the first, a recess of about ten days including Christmas and New Year's; the second, the Easter Recess of about ten days at or near the first of April. The following are also observed as holidays: Thanksgiving Day, Washington's Birthday, Patriots' Day, Memorial Day and Ivy Day.

RANK

The rank of a student in each course is computed on a scale of ten (10), but is preserved on the College records in the letters A, B, C, D and E. A signifies a rank from 9 to 10; B, a rank from 8 to 9; C, a rank from 7 to 8; D, a rank from 6 to 7; E, a rank lower than 6, and a condition.

EXAMINATIONS

The regular examinations of the college are held at the close of each Semester.

An unexcused absence from an examination entails a mark of zero. In case of illness or other unavoidable cause of absence from examination, the Dean has power to suspend the action of this rule.

REPORTS OF STANDING

A report of the rank of each student is sent to the parent or guardian at the close of each Semester. The report contains a statement of the standing of the student in each of his courses, together with the number of unexcused absences from chapel.
Administration of the College

ATTENDANCE AT EXERCISES

Attendance is required of all students at recitations and lectures continuously throughout the Semester, and at the daily college prayers which are held on each week day at 8.20 A.M., and on Sundays at 5 P.M.

REGISTRATION

All students are required to register on the first day of each Semester. The Dean's office will be open from 8.30 A.M. to 4.30 P.M. for this purpose. A fee of two dollars is charged for registration after the opening day.

FEES FOR EXTRA COURSES

The payment of fees for extra courses is regulated by the following provisions:

(1) The sum of seven dollars and a half ($7.50) is charged for each extra course (save as provided in 4 below), the same to be paid in advance and to be rebated at the close of the Semester in which the course is taken, provided the four regular courses and the extra course be passed, and the extra course be not taken to remove a condition previously incurred in that subject or substituted for a condition in some other subject. (2) Such charges are remitted in the case of the two required fifth courses, provided these be not taken prior to Senior Year. (3) Courses repeated for the removal of a condition and courses substituted for such conditions are regarded as extra courses. (4) For each of the three subjects in Freshman Mathematics, and for Hygiene and English 5, the charge is pro rata whenever these subjects are in question under the preceding provisions.

MEDICAL ATTENDANCE

A fund of $1,000, given by Mr. and Mrs. George F. Godfrey, of Bangor, in memory of their son, Henry Prentiss Godfrey, is devoted to providing medical attendance for students who may be sick while in college.

In case of illness students should immediately call upon or summon the college physician, Dr. Whittier, whose office is in Adams Hall.
Scholarships

The income of over One Hundred and Fifty Thousand Dollars is devoted to scholarships and prizes in aid of meritorious students of slender means.

Applications for scholarships must be made upon blank forms furnished at the office of the Treasurer of the college. They must be made out anew each year; signed by both the student and his parent or guardian; and deposited in the Treasurer's office before November 15.

Brown Memorial Scholarships. A fund for the support of four scholarships in Bowdoin College, given by Hon. J. B. Brown of Portland, in memory of his son, James Olcott Brown, A.M., of the Class of 1856.

According to the provisions of this foundation, there will be paid annually the income of one thousand dollars to the best scholar in each undergraduate class who shall have graduated at the High School in Portland after having been a member thereof not less than one year.

Shepley Scholarship. A fund of $1,000, given by Hon. Ether Shepley, LL.D., of Portland, late Chief Justice of the Supreme Court of Maine.

Mary L. Savage Memorial Scholarship. A scholarship of $1,000, founded by Rev. William T. Savage, D.D., of Quincy, Ill., in memory of his wife, Mary L. Savage.

Benjamin Delano Scholarship. A scholarship of $1,000, bequeathed by Captain Benjamin Delano of Bath.

And Emerson Scholarships. A fund amounting at present to $7,000, given by And Emerson, Esq., of Boston, through Rev. Dr. E. B. Webb.

Stephen Sewall Scholarship. A scholarship of $1,000, given by Deacon Stephen Sewall of Winthrop.
Scholarships

The income of the preceding five scholarships is to be appropriated for the aid of students preparing to enter the ministry of the Evangelical Trinitarian churches.

John C. Dodge Scholarship. A fund of $1,000, given by Hon. John C. Dodge, LL.D.

Alfred Johnson Scholarships. Three scholarships of $1,000 each, founded by Alfred Waldo Johnson of Belfast, of the Class of 1845 in memory of his grandfather, Rev. Alfred Johnson, and of his father, Hon. Alfred Johnson.

William B. Sewall Scholarship. A scholarship of $1,000, founded by Mrs. Maria M. Sewall, in memory of her husband, William B. Sewall, Esq.

Mary Cleaves Scholarships. Three scholarships of $1,000 each, founded by the will of Miss Mary Cleaves.

Cram Memorial Scholarship. A scholarship of $1,000, founded by Hon. Marshall Cram of Brunswick, in memory of his son, Nelson Perley Cram, of the Class of 1861, who lost his life in the service of his country.

Charles Dummer Scholarships. A fund of $6,000, given by Mrs. Almira C. Dummer, in memory of her husband, Charles Dummer, A.M., who was for many years a member of the Board of Overseers.

W. W. Thomas Scholarships. Six scholarships of $1,000 each, founded by Hon. W. W. Thomas of Portland, to be awarded under certain conditions.

Buxton Scholarship. A fund at present amounting to $3,800, contributed by Cyrus Woodman, Esq., of Cambridge, Mass., in aid of deserving students, preference being given to natives and residents of Buxton.

Pierce Scholarship. A scholarship of $1,000, bequeathed by Mrs. Lydia Pierce of Brunswick, in memory of her son, Elias D. Pierce.
Bowdoin College

Blake Scholarship. A fund of $4,000, bequeathed by Mrs. Noah Woods, of Bangor, in memory of her son, William A. Blake, of the Class of 1873.

Hulda Whitmore Scholarships. Two scholarships of $2,500 each, given by Hon. William Griswold Barrows, LL.D., of Brunswick, in memory of his wife, to be awarded by the President under certain conditions.

Nathaniel McLellan Whitmore Scholarship and George Sidney Whitmore Scholarship. Two scholarships of $1,000 each, given by Mrs. Mary J. Whitmore, in memory of her sons, Nathaniel McLellan Whitmore, of the Class of 1854, and George Sidney Whitmore, of the Class of 1856.

George Franklin Bourne Scholarship. A scholarship of $1,000, given by Mrs. Narcissa Sewall Bourne, of Winthrop.

Lockwood Scholarship. A scholarship of $1,000, established by Mrs. Sarah F. Lockwood in memory of Hon. Amos DeForest Lockwood, a former treasurer of the college.

William Little Gerrish Scholarship. A scholarship of $1,000, given by Dr. F. H. Gerrish, in memory of his brother, William Little Gerrish, of the Class of 1864.

Lawrence Scholarships. A fund of $6,000, given by Mrs. Amos Lawrence of Massachusetts, the income to be annually appropriated for the whole or a part of the tuition of meritorious students who may need pecuniary assistance, preference being given to those who shall enter the college from Lawrence Academy, at Groton, Mass.

G. W. Field Scholarships. Two scholarships of $2,000 each, given by Rev. George W. Field, D.D., of Bangor, of the Class of 1837. In awarding the scholarships, preference is to be given, first, to students or graduates of the Bangor Theological Seminary, and second, to graduates of the Bangor High School.

Justus Charles Fund. A fund established by the will of Justus Charles of Fryeburg, for such indigent students as, in the opinion of the President, are most meritorious, deserving, and needy.

Moses R. Ludwig and Albert F. Thomas Scholarship. Founded by Mrs. Hannah C. Ludwig of Thomaston.
Scholarships

Joseph N. Fiske Scholarship. A scholarship of $1,000 given by Mrs. Charlotte M. Fiske, of Boston in memory of her husband.

Crosby Stuart Noyes Scholarships. Two scholarships of $2,000 each, established by Crosby S. Noyes, A.M., of Washington, D. C. In awarding these, preference is to be given to natives or residents of Minot.

Moses M. Butler Scholarships. A fund of $10,000 given by Mrs. Olive M. Butler, of Portland, in memory of her husband, Moses M. Butler, of the Class of 1845, to establish four scholarships.

Stanwood Alexander Scholarship. A scholarship of $2,500, given by Hon. D. S. Alexander, of Buffalo, N. Y., Class of 1870, in memory of his father, Stanwood Alexander, of Richmond, Maine, to be awarded under certain conditions.

John Prescott Webber, Jr., Scholarship. $2,500, given by John P. Webber, Esq., of Boston, Mass., in memory of his son, John Prescott Webber, Jr., of the Class of 1903.

Ellen J. Whitmore Scholarship. A scholarship of $2,000, given by Miss Ellen J. Whitmore, of Brunswick.

Cyrus Woodman Scholarships. A fund now amounting to $3,400 was given by Miss Mary Woodman, of Cambridge, Mass., to establish one or more scholarships in memory of her father.

Fred Whitney Flood Scholarship. The sum of $100 is given each year by Louis Clinton Hatch, of Bangor, of the Class of 1895, as a scholarship in memory of his college-mate, Fred Whitney Flood.

Garcelon and Merritt Fund. The sum of $1,000 from the income of the Garcelon and Merritt Fund is appropriated for the aid of worthy students.
Bowdoin College

William Law Symonds Scholarship. A fund of $3,000, founded by his family in memory of William Law Symonds, of the Class of 1854; the income to be applied by the Faculty in aid of Bowdoin students, preference to be given to those showing tendency to excellence in Literature.

Class of 1872 Scholarship. A fund of $2,500 given by the Class of 1872.

Charles M. Cumston Scholarship. A fund of $23,850 given by Charles McLaughlin Cumston, LL.D., of the Class of 1843, the income to be given preferably to a graduate of the English High School of Boston.

Cyrus Woodman Trust Fund. A fund, now amounting to $35,000, established by Cyrus Woodman, Esq., of the Class of 1836, one-half of the income of which is appropriated for scholarships.

Charles Carroll Everett Scholarship. Certain real estate in Brunswick, in trust, the net income of which is given to that member of the graduating class of Bowdoin College whom the President and Trustees shall deem the best qualified to take a postgraduate course in either this or some other country.

Albion Howe Memorial Loan Fund. A sum of $1,200 given by Lucian Howe, M.D., of Buffalo, N. Y., for the establishment of a loan fund in memory of his brother, Albion Howe, of the Class of 1861.

Henry W. Longfellow Graduate Scholarship. Ten thousand dollars given by the daughters of Henry W. Longfellow — Miss Alice M. Longfellow, Mrs. Edith L. Dana, and Mrs. Anne L. Thorp — for a graduate scholarship "that would enable a student, after graduation, to pursue graduate work in some other College, or abroad, if considered desirable; the work to be done in English, or general literature, and the field to be as large as possible — Belles Lettres in a wide sense. The student to be selected should be some one not merely proficient in some specialty, or with high marks, but with real ability in the subject, and capable of profiting by the advanced work, and of developing in the best way."

Richard Almy Lee Scholarship. A scholarship providing for the tuition of one student. Established by Elizabeth Almy Lee in memory of her son, a Senior of the Class of 1908, who, with his friend
and companion, John Franklin Morrison, of the same class, lost his
life July 9, 1907, while on a pleasure cruise along the coast. In mak-
ing the award preference will be shown to the Beta Theta Pi
Fraternity.

John Franklin Morrison Scholarship. A scholarship of
$1,000 founded by Benjamin F. Morrison, of Medford, Mass., in
memory of his grandson, John Franklin Morrison, of the Class of
1908 — preference to be given to residents of Medford.

Annie E. Purinton Scholarship. Five thousand dollars given
by Mrs. D. Webster King in memory of her sister Miss Annie
E. Purinton for the establishment of a scholarship "the income
thereof to be used to assist some deserving student through his
college course, preference being given to a Topsham or Brunswick
boy."

George P. Davenport Loan and Trust Fund. A sum of
$200 given by George P. Davenport, A.M., of Bath, Maine, for
the establishment of a loan fund.

Class of 1881 Scholarship. A fund of $2000 given by the
Class of 1881.

Edward Henry Newbegin Scholarship. One thousand dol-

lars ($1,000) given by Henry Newbegin, A.M., of the Class of
1857, to establish a scholarship in memory of his son, Rev. Edward
Henry Newbegin, of the Class of 1891. To be awarded under
certain conditions.

Joseph E. Merrill Scholarships. Four thousand dollars per
year, from the income of the Joseph E. Merrill Fund to assist
needy and deserving American-born young men, preference being
given to those born in the State of Maine, in securing an education
in Bowdoin College.

Prizes

Smyth Mathematical Prize. A fund of $6,500, the gift of
Henry J. Furber, Esq., of Chicago, named by him in honor of
Professor William Smyth. From the present income of the fund
$300 is given to that student in each Sophomore Class who obtains
the highest rank in the mathematical studies of the first two years.
The rank is determined mainly by the daily recitations; but the
Faculty may at their discretion order a special examination, the result
Bowdoin College

of which will be combined with the recitation rank. The successful candidate receives $100 at the time the award is made. The remaining $200 is paid to him in instalments at the close of each term during Junior and Senior years. If a vacancy occurs during those years, the next in rank secures the benefit of the prize for the remainder of the time.

**David Sewall Premium.** A prize amounting to Ten Dollars is awarded annually to a member of the Freshman Class for excellence in English Composition.

**Brown Composition Prizes.** Two prizes, one of Thirty Dollars and one of Twenty Dollars, established by Mr. Philip G. Brown, of the Class of 1877, in memory of Philip Henry Brown, Esq., of Portland, of the Class of 1851, are offered to the Senior Class for excellence in Extemporaneous English Composition.

**Sewall Greek Prize.** A prize of Twenty-five Dollars, given by Professor Jotham Bradbury Sewall, of Brookline, Mass., of the Class of 1848, formerly Professor of Greek in the college, is awarded to the member of the Sophomore Class who sustains the best examination in Greek.

**Sewall Latin Prize.** A prize of Twenty-five Dollars, also given by Professor Sewall, is awarded to the member of the Sophomore Class who sustains the best examination in Latin.

**Goodwin Commencement Prize.** A prize of Fifty Dollars, given by Rev. Dr. Daniel Raynes Goodwin, of Philadelphia, of the Class of 1832, is awarded each year to the author of the best Commencement Part.

**Class of 1868 Prize.** A prize of Thirty-five Dollars, contributed by the Class of 1868, is given annually to the author of the best written and spoken oration in the Senior Class.

**Pray English Prize.** A prize of Forty-five Dollars, given by Dr. Thomas J. W. Pray, of Dover, N. H., of the Class of 1844, is awarded each year to the best scholar in English Literature and original English Composition.

**Goodwin French Prize.** A prize of Twenty-five Dollars, given by Rev. Dr. Daniel Raynes Goodwin, is awarded annually to the best scholar in French.
Prizes

NOYES POLITICAL ECONOMY PRIZE. This prize, consisting of the annual income of one thousand dollars, was established by Crosby Stuart Noyes, A.M., and is awarded to the best scholar in Political Economy.

CLASS OF 1875 PRIZE IN AMERICAN HISTORY. This prize, consisting of the annual income of three thousand dollars, was established by William J. Curtis, of New York City, of the Class of 1875, and will be awarded to the student who writes the best essay and passes the best examination on some assigned subject in American History.

BRADBURY DEBATING PRIZES. Prizes amounting to $60, given by Hon. James Ware Bradbury, LL.D., of the Class of 1825, are awarded each year for excellence in debating.

HAWTHORNE PRIZE. A prize of $40, given by Mrs. George C. Riggs (Kate Douglas Wiggin), of New York, is awarded each year to the author of the best short story. The competition is open to members of the Sophomore, Junior and Senior Classes.

ALEXANDER PRIZE FUND. This fund was established by Hon. D. S. Alexander, of the Class of 1870, to furnish two prizes of $20 and $10 for excellence in select declamation. Competition is open to Juniors, Sophomores and Freshmen.

PHILO SHERMAN BENNETT PRIZE FUND. This fund was established by Hon. W. J. Bryan from trust funds of the estate of the late Philo Sherman Bennett, of New Haven, Connecticut, the proceeds to be used for a prize for the best essay discussing the principles of free government. Competition is open to Juniors and Seniors.

ALMON GOODWIN PRIZE FUND. This fund of $1,000 was established by Mrs. Maud Wilder Goodwin, in memory of her husband, Almon Goodwin, of the Class of 1862. The annual income is awarded to a Phi Beta Kappa man to be chosen by vote of the Trustees of the College at the end of the recipient's Junior year.

HILAND LOCKWOOD FAIRBANKS PRIZE FUND. This fund of $2,000 was established by Captain Henry N. Fairbanks, of Bangor, in memory of his son, Hiland Lockwood Fairbanks, of the Class of 1895. One half of the annual income is awarded for excellence of work in debating (English 6 and English 7) throughout the year; one fourth is awarded as two prizes of $15.00 and $10.00 for excellence of work in declamation (English 5) during the second semester; and the remaining fourth is left to the disposal of the English Department for the promotion of interest in public speaking.
Bills, containing college charges, are mailed to the parent or guardian of each student at the close of each Semester; these bills become payable at once.

No students will be advanced in class standing until all the dues of the previous year have been paid; and no degrees will be conferred upon students who have not paid all their dues to the college.

No student will be dismissed from college on request unless he shall have paid all his college bills, including that of the current Semester.

During the time that term bills which are overdue remain unpaid a student receives no credit for college work.

EXPENSES

The Bowdoin College Bulletin, New Series, No. 10, a pamphlet entitled Earnings and Expenses of Bowdoin College Students, will be sent on application. The facts in this pamphlet were obtained in returns from nearly two hundred Bowdoin undergraduates.

The following is an average expense account:

Rooms in the college dormitories may be rented at prices varying from $36 to $54 a year for each occupant where two share the room.
Expenses

The price is doubled for a single occupant. The item of steam heat is included. Electric lights are furnished at the rate of $6 per 16 c.p. lamp per year. None of the college rooms is furnished. Application for rooms should be made to the Treasurer.

SELF-HELP

Bowdoin College Bulletin No. 10 furnishes some interesting facts concerning the earnings of Bowdoin students. Of the 192 students from whose reports that pamphlet was compiled, 167 earned a part or all of their college expenses. The amounts reported include scholarships, prizes and the income of the vacations. These 167 men earned, during the year 1906-7, a total of $37,799.76. The average amount earned was $225. In the Senior Class, 20 men earned during this year $5670.26, the average amount being $283.51. These same men earned during their college course $18,045.99. Here are at least 20 men in a single class who, during their four years at Bowdoin College, have earned an average of $902.34.

In the pamphlet from which these facts are taken will be found many other concrete items, such as ways for earning money, which will interest the prospective student obliged to support himself wholly or in part. This pamphlet will be sent on application.

The College Buildings

There are thirteen college buildings. The spacious campus, of about forty acres, upon which they are grouped is within five minutes' walk of the railroad station, one mile from the Androscoggin River with its picturesque falls, and about three miles from the shores of Casco Bay. A central heating and lighting plant supplies steam heat and electric light to all the buildings, which are also connected with the water and sewerage systems of the town.

MASSACHUSETTS HALL

This hall, named for the mother state from which the college derives its charter, was the first building erected for the uses of the college. On the first floor are the offices of the Treasurer and the
Bowdoin College

Dean of the college, and the room of the President and Faculty. In this room are the quaint old colonial fireplace and oven as used for a time by the family of the first president.

The second and third floors have been thrown together and now provide quarters for the department of surveying and drawing. The work in geology is here carried on. Here is also the mineralogical collection which has the special interest of having been the basis of Professor Cleaveland’s "Treatise on Mineralogy and Geology," the first systematic treatise on mineralogy published in this country.

THE DORMITORIES

There are three dormitories, of brick and stone, each one hundred feet by forty, and four stories in height. In the order of their erection they are Maine Hall, named for the District (now the State) of Maine; Winthrop Hall, named in honor of Governor John Winthrop of the Massachusetts Bay Colony; and Appleton Hall, named in honor of President Jesse Appleton, the second president of the college. Each of these dormitories contains thirty-two suites, consisting of a sitting-room or study, a bedroom, and an ample closet. The rooms are heated and lighted with steam and electricity from the central station, and the dormitories are supplied with water from the town system, and provided with toilet rooms and shower baths.
The College Buildings

KING CHAPEL

The chapel, built of undressed granite, and named in honor of Governor William King, the first Governor of Maine, is a Romanesque Church, the façade of which is marked by twin towers and spires which rise to the height of one hundred and twenty feet. The aisles and chancel are shut off from the nave by partition walls. The nave is the chapel proper, in which are held the daily religious exercises of the college. There is a broad central aisle, from either side of which rise the ranges of seats after the manner of a cathedral choir. The platform, with the reading-desk, occupies the entire width of the chapel at its eastern end, and behind it rises the rood-screen of carved and panelled walnut, surmounted by a rood-gallery affording entrance to an upper room in the chancel; and through this entrance is seen, from the chapel below, an oriel window. From the walnut wainscoting on the sides of the chapel to the clerestory windows an unbroken wall, more than thirty feet in height, is divided by decorative frescoing into large panels in which are mural paintings — the gifts of individuals and of college classes — representing the Annunciation, the Adoration, the Baptism, and the Ascension, Paul preaching at Mars Hill, the Healing at the Beautiful Gate, St. Michael and the Dragon, Adam and Eve after the Transgression, the Giving of the Law and the Return of David after His Victory over Goliath. A decorated ceiling which is carried up into the roof has a blue ground overlaid with golden stars. The music gallery is over the entrance to the chapel, between the two towers, and contains an organ which was a gift to the college from Oliver Crocker Stevens, of the Class of 1876, and Mrs. Stevens.

The right aisle of the building is devoted to the uses of a psychological laboratory. The left aisle contains the rooms of the Christian Association. At the rear is a lecture room known as Banister Hall. This room was named to commemorate the Hon. William B. Banister of Newburyport, Mass., whose friendship and influence had been kindly and effectually exercised in behalf of the college and the members of whose family had contributed to its funds.

MEMORIAL HALL

This building, erected by the contributions of alumni and friends, is a memorial to the graduates and students of the college who served
Bowdoin College

in the Union army or navy during the Civil War. It is a granite structure in the French-Gothic style of architecture. On the first floor are four recitation rooms. The memorial hall proper occupies the whole of the second floor, and is a spacious audience room used for exhibitions and other public exercises. Aside from its architectural and decorative finish, it is notably adorned with busts and portraits of presidents, professors, benefactors, and distinguished graduates of the college. A window of stained glass, the gift of Miss Sarah Orne Jewett, commemorates her father, Professor Theodore Herman Jewett, M.D., of the Class of 1834. The names and military rank of two hundred and ninety Bowdoin men who fought to maintain the Union are inscribed on bronze tablets, the gift of Thomas Hamlin Hubbard, of the Class of 1857.

MARY FRANCES SEARLES SCIENCE BUILDING

This building was a gift to the college from Mr. Edward F. Searles, in memory of his wife, whose name it bears. It is built of Perth Amboy brick, with trimmings of Ohio stone, and is practically fire-proof. It is of the Elizabethan style of architecture, one hundred and eighty feet in length, and, with its two wings, one hundred and five feet in depth. It is three stories in height with a high, well-lighted basement, and contains the college clock, which strikes the hours and half-hours. It is designed for the use of the three departments of chemistry, physics and biology, and contains both large and small laboratories for each of these departments, with lecture rooms, offices, store rooms, cabinets, a work room for the manufacture of apparatus, a conservatory for plants, etc. It is fitted with all the devices and conveniences which experience has found to be desirable, and is fully adapted to the uses for which it was designed. A part of the museum of natural history, which was established through the liberality of the late Peleg Whitman Chandler, of the Class of 1834, and named the Cleaveland Cabinet in memory of Professor Parker Cleaveland, is now on exhibition in this building in connection with the departments of biology and mineralogy.
The College Buildings

**WALKER ART BUILDING**

This building, designed for the exhibition of the art treasures of the college,—except the portraits and busts in Memorial Hall and the mural paintings in King Chapel,—was erected by the Misses Harriet and Sophia Walker, of Waltham, Massachusetts, as a memorial of their uncle, the late Theophilus Wheeler Walker. It is one hundred feet in length by seventy-three in depth, and is surrounded on three sides by a brick-paved terrace, about twenty-five feet in breadth, with granite supporting walls and parapets. The materials used in the building are Freeport granite, Indiana limestone, and brick.

The main entrance consists of a loggia, in front of which, and supporting the wall above, are six Ionic columns of stone. Niches in the front wall of the building on either side of the loggia contain bronze copies, by De Angelis, of Naples, of the classical statues of Demosthenes and Sophocles. Pedestals on either side of the ascent to the loggia are surmounted by copies in stone of the lions of the Loggia dei Lanzi.

The entrance from the loggia is to the Sculpture Hall, occupying the central portion of the building, beneath a dome which rises to the height of forty-seven feet, and furnishes light to the apartment through a skylight at the top. The four tympana below the dome, each twenty-six feet in width, are filled with four paintings symbolizing the artistic achievements of Athens, Rome, Florence and Venice, executed by Messrs. John La Farge, Elihu Vedder, Abbott Thayer and Kenyon Cox, respectively. Casts of classical figures and groups of statuary are exhibited in this room.

The Bowdoin, Boyd, and Sophia Wheeler Walker Galleries are entered from three sides of the Sculpture Hall. The Bowdoin Gallery contains chiefly the collection of about one hundred paintings, and one hundred and fifty original drawings by old and modern masters bequeathed to the college by Honorable James Bowdoin. The Boyd Gallery contains the collection of paintings bequeathed by Colonel George W. Boyd, of the Class of 1810, with others of later acquisition, a collection of Japanese and Chinese works of art, loaned by Professor William A. Houghton, a collection of objects of Oriental Art given by David S. Cowles, Esq., and formerly constituting a part of the Houghton Collection, the Virginia Dox collection of objects of native American art, and collections given or loaned by Mr. George W. Hammond,
Bowdoin College

Mrs. Levi C. Wade, Mr. Harold M. Sewall, Dana Estes, Edward P. Warren, and other friends of the college. The Sophia Wheeler Walker Gallery contains specimens of ancient glass, Roman sculpture, old Flemish tapestry, Oriental ivory carvings, miniatures, etc., with paintings and drawings by modern artists of the foremost rank, and a bronze relief portrait, by French, of Theophilus Wheeler Walker,—all given by the Misses Walker.

The galleries are finished in oak, and are lighted from above through large skylights. In the basement are a lecture room, a room of Assyrian sculpture, curator’s and students’ rooms, lavatory, etc. The building is open to visitors about five hours daily.

HUBBARD HALL

The library building affords convenient and adequate accommodation for the College Library, and for its prospective growth, with reading and consultation rooms, lecture and conference rooms, etc. It is a gift to the college from General Thomas Hamlin Hubbard of the Class of 1857, and his wife, Mrs. Sibyl Fahnestock Hubbard. It is about one hundred and seventy feet in length, and fifty feet in depth, with a wing in the rear, for a stack room, eighty-eight feet by forty-six. It is entirely fire-proof, the materials used in its construction being granite, Indiana limestone, brick, iron and steel. It is of the seventeenth century Gothic architecture, with the main entrance through a central projecting tower, the façade being still further broken by semicircular projections at the ends. It is situated at the southern end of the campus, fronting towards Massachusetts and Memorial Halls, and, with the buildings already mentioned, completes the campus quadrangle.

SETH ADAMS HALL

This hall is built of brick with stone trimmings, is about one hundred feet long by fifty wide and is three stories and a half in height. It is named in honor of the late Seth Adams, of Boston, who contributed generously to its erection. On the first floor is the office of the dean of the Medical School and also two recitation rooms assigned to the use of the academical department. The second and third floors are devoted exclusively to the uses of the medical department, each floor having a large amphitheatral lecture room with an adjoining office for the instructor. On the second floor is the laboratory of bacteriology and pathology and the office of the college physician. The third and
The College Buildings

fourth floors are given to the Seavey Anatomical Museum, the dis-
secting-room, and the newly completed physiological laboratory.

THE OBSERVATORY

The Astronomical Observatory, for which the college is largely
indebted to the late John J. Taylor, of Fairbury, Illinois, was mainly
designed for purposes of instruction. Although it is the smallest of
the college buildings, great care was exercised in its construction, and
it is supplied with a telescope mounted in a revolving turret, a transit
instrument, and the usual accessories for meridian observations.

THE HUBBARD GRAND-STAND

The Grand-Stand, given by Gen. Thomas H. Hubbard, of the Class
of 1857, at a cost of about $35,000, provides permanent quarters for
out-of-door athletics.

The building stands on a terrace three feet above the field level.
It is one hundred and twenty-three feet long and thirty-seven feet
wide. The walls are on a cement foundation. Below the terrace
level they are of granite, and above they are of rubble or field stone
as far as the tops of the basement windows, where there is a water
table of granite. Above the water table the walls are of selected red
brick. The frame is of steel and iron, and the roof is covered with
green slate.

The interior of the building is of fire-proof construction throughout.
The west end of the basement is occupied by the quarters for the
home teams, and consists of dressing-room, lavatory, store-room and
drying-room. The east end provides quarters for the visiting team,
also instructor's office, janitor's room and boiler-room. The base-
ment is heated by steam and lighted by electricity. The lavatories
are supplied with hot and cold water.

The grand-stand occupies the whole of the second floor. It has
a seating capacity of five hundred and eighty, with promenade eight
feet wide, in which, if necessary, extra seats can be placed. Shutters
protect the open part of the grand-stand during winter.

THE SARGENT GYMNASIUM

The gymnasium, erected in 1885, is named in honor of Dr. Dudley
Allen Sargent, of the Class of 1875, the first director under the system
Bowdoin College

of required physical exercise. It is supplied with the most approved apparatus for gymnastic instruction, the gift of Dr. Sargent, and is provided with bath rooms and individual lockers. A part of the basement of this building and an extension in the rear are used as a central station for generating steam heat and electricity for the heating and lighting of all the college buildings.

A straight path through the pine grove in the rear of the campus leads from the gymnasium a short distance to the Whittier Athletic Field. This field, named in honor of Dr. Frank Nathaniel Whittier, the present director of the gymnasium, who was largely instrumental in the acquisition and preparation of it for athletic purposes, is about five acres in extent, and is well adapted in all respects for baseball, football, and track athletics.

THE LIBRARY

The Library contains ninety-eight thousand volumes and several thousand unbound pamphlets. It includes the private library of Hon. James Bowdoin, received after his death in 1811, the library of the Medical School of Maine, established in 1820, the extensive collections of the Peucinian and Athenæan Societies, added in 1880, and valued donations received from numerous institutions and individuals during the century of its existence. A large proportion of its contents, however, has been purchased within the last two decades with a view to aid the work of instruction by supplying both teachers and students with the best books and the leading periodicals in the various departments of the curriculum.

Attention has been directed, also, towards the building up of a complete and attractive library of general reference in which the literature of the present, as well as of the past, is given its proper place, and which shall serve as an active agent in the attainment of liberal culture. This portion of the library, containing upwards of ten thousand volumes, is arranged in the spacious and well-lighted room at the east end of Hubbard Hall. The corresponding room on the west is given to some six thousand bound volumes of magazines that are indexed in Poole's Index to Periodical Literature, and to the current periodicals, of which the library receives about two hundred. Adjacent is a special reading-room for the daily newspapers, and another for a choice collection, not yet complete, of fine editions of the works of the great masters of literature.
The College Buildings

The entire collection is classified by the Decimal Classification and is supplied with a dictionary card catalogue. The library is a depository of the catalogue cards issued by the Library of Congress and this bibliographical collection of increasing value and serviceableness can be consulted by any investigator. Though no formal instruction in bibliography is given, the librarian and his assistants are ready to lend personal aid to inquirers. Moreover, through the cooperation of the Department of Rhetoric, the librarian is enabled to meet all the new students in groups of eight or less at required conferences of an hour each in which the use of the card catalogue, the principles that govern the location of books, and the scope of certain common works of reference are set forth by practical exercises. During term time, the library is open continuously from 8.30 A.M. to 5.30 P.M., and in the evening from 6.45 to 9.45. In vacation it is also open daily, with the exception of Sundays and holidays. Students are allowed to borrow three books at a time, and to retain them, if needed, four weeks. The privileges of the library are extended to graduates and to clergymen, also to any persons on recommendation of the Library Committee.

Annual accessions, which average three thousand volumes, are made to the library by means of an appropriation of the Boards for the purpose, and from the proceeds of the following library funds:

Smyth Library Fund. Provision for this fund was made in 1876 by Hon. Henry J. Furber, of the Class of 1861, from the excess income of the Smyth Mathematical Prize. Its proceeds are devoted to mathematical books.

Sibley Library Fund. This fund, now amounting to $7000, was established in 1881 by Jonathan Langdon Sibley, A.M., Librarian of Harvard College, and is for the purchase of books relating to American history.

Sherman Library Fund. This fund of $1000 was established in 1882 by Mrs. John C. Dodge, of Cambridge, Mass., in memory of her brothers, Joseph Sherman, LL.D., of the Class of 1826, and Thomas Sherman, M.D., of the Medical Class of 1828. Its proceeds are given to current literature.

Ayer Library Fund. This fund of $1000 was established by the Athenæan Society in 1887 from a bequest of Hon. Samuel Hazen Ayer, of the Class of 1839.
Bowdoin College

Bond Library Fund. This fund, amounting to $7000, was given by Rev. Elias Bond, D.D., of the Class of 1837. From its income are purchased books relating to religion and ethics.

Packard Library Fund. This fund, based upon receipts from certain publications of the library, is devoted to the purchase of books relating to the State of Maine as a memorial of Professor Alpheus Spring Packard, D.D., of the Class of 1816.

Wood Library Fund. This fund of $1000 was given in 1890 by Dr. Robert W. Wood, of Cambridge, Mass., of the Medical Class of 1832. From its proceeds are purchased books on sociology.

George S. Bowdoin Library Fund. This fund of $1000, given in 1895 by the gentleman whose name it bears, is devoted to the maintenance of a collection of books relating to the Huguenots.

Joseph Walker Fund. This fund, now amounting to $5000, was given in 1896 by the trustees under the will of the late Joseph Walker of Portland. Its proceeds in accordance with a vote of the Boards are applied to the general uses of the library.

Philip Henry Brown Library Fund. This fund of $2000, the income of which is devoted to the purchase of books on rhetoric and literature, was given in 1901 by the executor of the estate of Captain John Clifford Brown in fulfillment of the latter's desire to establish a memorial of his father, Philip Henry Brown, Esq., of the Class of 1851.

Drummond Library Fund. This fund of $3000 is a memorial of the Rev. James Drummond, of the Class of 1836, and was given in 1907 by his widow and his daughter, Mrs. Charles F. Dole, of Boston, Mass.

Class of 1877 Library Fund. This fund of about $1000 is a class contribution.

Class of 1882 Library Fund. This fund of $2300 was given by the Class of 1882 as its contribution to the permanent funds of the college in 1908.

Class of 1890 Library Fund. This fund of about $1000 is a class contribution.

Class of 1901 Library Fund. This fund of about $1000 is a class contribution.

Fiske Library Fund. This fund of $1000 was established by the will of Rev. John Orr Fiske, D.D., of the Class of 1837.

General Statement

The Medical School of Maine, established by the first legislature of the State, was by its charter placed under the control of the Boards of Trustees and Overseers of Bowdoin College, of which institution it is the Medical Department.

Its course of instruction covers four years of 36 weeks each. The studies are distributed through the curriculum according to the following schedule:

First Year: Anatomy, Embryology, Histology, Physiology, Chemistry and Personal Hygiene.
Second Year: Anatomy, Physiology, Chemistry, Pathology, Bacteriology.
Third Year: Internal Medicine, Surgery, Materia Medica, Pharmacology and Therapeutics, Diseases of Women, Obstetrics, Diseases of the Skin.
Fourth Year: Internal Medicine, Surgery, Materia Medica, Pharmacology and Therapeutics, Medical Jurisprudence, Public Hygiene, Diseases of Women, Diseases of Children, Neurology and Mental Diseases, Clinical Instruction in Diseases of the Skin, Diseases of the Genito-Urinary System, Diseases of the Eye, Diseases of the Ear, Diseases of the Joints, Diseases of the Nose and Throat.

The students of the first and second years are instructed at Brunswick, where the school has been situated since its foundation in 1820, and where the facilities are excellent for imparting a knowledge of the primary branches. The third and fourth year classes are taught in Portland on account of the superior clinical advantages afforded in that city. The building designed for the use of the school and now occupied by it furnishes ample accommodations for the advanced classes. The location of the building is on Chadwick Street, near the Maine General Hospital, in which institution nearly all the teachers in the school are medical or surgical officers and the Directors of which are in full sympathy with the purposes of the Faculty.

While the Maine General Hospital is the chief source of supply of
General Statement

clinical material for the school, Portland has a number of institutions, such as the Maine Eye and Ear Infirmary, the Children’s Hospital, the Portland Charitable Dispensary, Portland Tuberculosis Class, Female Orphan Asylum, St. Elizabeth’s Orphan Asylum, the Holy Innocents’ Home, the Maine School for the Deaf, which will contribute to the bedside instruction of the students; and the various teachers, as opportunity permits, will show individual pupils interesting cases in their private practice.

The 91st annual course began on Thursday, the 13th of October, 1910, and will continue thirty-six weeks. Final examinations for each class will be held in the period from June 7 to 21, 1911, inclusive.

Examinations for admission to the school will be held at 9 A. M. on Thursday, October 12, 1911, in Brunswick.

Re-examinations, deferred examinations and examinations for advanced standing for those who desire to enter the second year will be held in Brunswick, on Friday, October 13, 1911, examination in anatomy at 9 A. M., in physiology at 2 P. M. Re-examinations, deferred examinations and examinations for advanced standing for those wishing to enter the third year will be held in Portland on Saturday, October 14, 1911, examination in anatomy at 9 A. M., in physiology at 2 P. M. Re-examinations, deferred examinations, and examinations for those wishing to enter the fourth year will be held in Portland on Friday and Saturday, October 13 and 14, 1911, at hours to be hereafter appointed.

At the end of the first, second and third years students who have passed successful examinations will receive certificates from the Dean.

A student who fails to pass any branch at the required examination in June may present himself for re-examination at the beginning of the next course. If he fails at this examination, he will not again be examined in that branch until the expiration of the year, unless admitted to conditions by vote of the Faculty on recommendation of the head of the department in which he has failed.

On recommendation of the head of a department, any student who has failed on examinations as above provided in the study of that department may by vote of the Faculty be allowed to enter upon the work of the next year, but he shall not be admitted to any examination of that year until he shall have passed a satisfactory examination in the study or studies which he has previously failed to pass.
No student will be admitted to the privilege of conditions if he has failed in more than two departments.

Every student who fails to maintain a satisfactory standard of work will be warned of his deficiency from time to time, before the end of the term.

An examination which is not completed receives no consideration.

The systematic courses of instruction will begin on Monday morning, October 16, 1911.

On arriving in Brunswick students should apply at the office of the Dean in the medical building, enter their names, receive directions concerning their examinations, if any are needed, pay their fees and be advised as to boarding-places.

In Portland they should apply at the office in the medical building for the same purposes. Dr. Charles D. Smith will act as deputy dean.

**EXPENSES**

**FOR INSTRUCTIONS**: In each of the required four years, $100. This must be paid promptly one-half at the opening of the course and the balance at the beginning of the second half of the course.

**FOR EXAMINATIONS**: Payable at the close of the term of instruction—

- In Anatomy ........................................ $5.00
- In Physiology ...................................... 5.00
- In Chemistry ........................................ 5.00
- Bacteriology and Pathology .................... 5.00
- Obstetrics .......................................... 5.00

These five fees are credited on the diploma or graduation fee.

For every re-examination in any of the departments in any year, $3.00. This fee is not credited on the diploma fee.

For examination or re-examination in any branch, at a time not regularly appointed, a fee of $5.00 must be paid, in addition to the prescribed fee for that examination.

**MISCELLANEOUS**: The matriculation fee of $5.00 is required of every student each year.

For materials used in the chemical laboratory courses, $3.00 for 120
Requirements for Admission

the first course, $2.00 for the second course, payable in advance at the Dean's office.

For materials used in the physiological laboratory, $2.00 for the first course, $1.00 for the second course, payable in advance at the Dean's office.

For anatomical material, its cost, payable in advance.

For graduation fee (not returnable), including the parchment diploma, $25.00. This will have been paid in the examination fees in the previous years.

Graduates of other schools, who have been engaged three years in the regular practice of medicine, may receive a general ticket upon presentation of their diplomas and payment of the matriculation fee. Graduates of other schools are not eligible for a degree from this school without attendance upon a full course of instruction immediately preceding the examination for such a degree.

All fees must be paid in cash and in advance.

Furnished rooms outside the College can be obtained at a rental of from $1.50 to $2.50 per week according to the conveniences. A sharing of the above expenses by two students brings the cost within reasonable limits.

The price of board is from $3.00 to $4.00 a week.

The cost of living in Portland has been found to be not in excess of that at Brunswick.

$15 to $25 a year covers the cost of books.

Requirements for Admission

Requirements for admission to the first year are those of the Association of American Medical Colleges, with the exception that one year of Chemistry is specifically required.

Section 1. (a) A bachelor's degree from an approved college or university.

(b) A diploma from an accredited high school, normal school, or academy requiring for admission evidence of the completion of an eight-year course in primary and intermediate grades, and for graduation not less than four years of study embracing not less than two years (4 points) of foreign languages, of which one must be Latin, two years (4 points) of mathematics, two years (4 points) of English,
Medical School of Maine

one year (2 points) of history, two years (4 points) of laboratory science, and six years (12 points) of further credit in language, literature, history or science.

(c) An examination in the following branches: A. Required (18 points); Mathematics (4 points); English (4 points); history (2 points); language (4 points — 2 must be Latin); science (taken from physics, chemistry, botany, zoology, 4 points). B. Optional (to 12 points); English (2 points); history (6 points); language (6 points); manual training (2 points); mechanical drawing (1 point); natural science (botany, zoology, 2 points); physical science (chemistry, physics, 2 points); trigonometry (1 point); and the following of which not more than 3 points will be accepted to make up the required amount of options: astronomy (1); civics (1); geology (1); physical geography (1); physiology and hygiene (1); political economy.

(One point in any subject in a high school or academic course demands not less than five periods per week of forty-five minutes each for eighteen weeks.)

(d) Certificates from reputable instructors recognized by the superintendents hereinafter to be mentioned, or by any state board of medical examiners duly authorized by law, may be accepted in lieu of any part of this examination.

Section 2. This examination will be conducted by the Superintendent of Schools of Brunswick and Topsham, John Albert Cone, A.B. It will be recognized that the appointment of the examiner is in accordance with the requirements of the Association of American Medical Colleges.

Section 3. A student may be allowed to enter on his medical work conditioned in not more than six points, and these conditions must be removed by satisfactory examination before he is allowed to enter on the second year of his medical course.

Students from other schools who apply for advanced standing must comply with the requirements for admission to the first year, must give satisfactory evidence that they have completed a course or courses of instruction, equivalent in kind and amount to that or those in this school preceding that to which admission is sought, and must pass examinations in all of the branches previously pursued by the class which they wish to enter. Certificates of the passing of examinations in other schools are not accepted in lieu of examinations.
Methods of Instruction

Students in the Senior Class of the Academic department are permitted to take the studies of the first year in the Medical department and thus are eligible for the first-year final Medical examinations.

It is desired that a literal interpretation shall be placed upon the stated requirements of the candidates for matriculation, as hitherto there have been not infrequent examples of those who inquire if other conditions than those named will not serve in lieu of the examination.

The Boards of Trustees and Overseers of Bowdoin College by recommendation of the Faculty have voted that in and after 1912 one year of study in a reputable college will be required for admission to the Medical Department, in which time particular attention shall be bestowed upon physics, chemistry, biology and either French or German. It is advised that students take two years of college work along the same lines.

GRADUATION

A candidate must be twenty-one years of age, and must have devoted to his professional studies four years, including a course of instruction in each of these years in some reputable, regular, incorporated medical institution, and the last course previous to examinations must have been in this school. He must present a satisfactory certificate of good moral character from a citizen of the town in which he resides. He must also pass a satisfactory examination in the required studies previously specified and present a thesis on some medical subject, a fair copy of which must be handed to the Dean at least ten days before the beginning of the final examinations.

Time spent in pharmacy, dental and veterinary institutions and in preparatory schools does not entitle a student to examinations for advanced standing.

METHODS OF INSTRUCTION

In order to afford to students who contemplate entering the school an idea of the facilities presented by this institution for acquiring a knowledge of the science and art of medicine, a brief statement is here made of the scope of the work in each department and the methods adopted for imparting instruction.
Medical School of Maine

Anatomy. The course in this branch extends over two years and covers every portion of human anatomy with special reference to its application in the practice of medicine and surgery. The scope is so extensive as to require a number of instructors and a division of the work; but an attempt is made to harmonize the various divisions and enable students to spend their time to the best possible advantage. In the classroom every part of human anatomy is taken up by systems as arranged in Gerrish's Text-Book. Some subjects are treated by lectures and many by demonstrations, but the greater part of the work consists of recitations and demonstration quizzes.

First-year students study embryology, histology, osteology, arthrology and visceral anatomy, including the study of the cerebro-spinal axis and organs of the special senses. Second-year work includes the remainder of systematic anatomy and relational anatomy. The class-room work is made valuable by the exhibition and demonstration of dissected parts, models and casts; and from time to time students are required to present drawings of different organs. Considerable attention is also paid to surface anatomy, which is studied on the living model. The total number of hours devoted to class-room work in gross anatomy in two years' time is one hundred and seventy-four, including thirty hours of osteology.

During the first half of the first year the different tissues and organs are studied microscopically in the histological laboratory and reproduced by free-hand drawing. One hundred and thirty-five hours are devoted to histology, thirty being didactic in character, the remainder laboratory work. Embryology is studied during the second half of the first year. Forty-five hours are devoted to laboratory work; thirty hours to lectures, recitations and quizzes.

First-year students devote one hundred and thirty-five hours to practical anatomy and dissect at least one part of the cadaver. Second-year students dissect in the second half term and spend two hundred and seventy hours in the anatomical laboratory. For this purpose a period of six weeks is reserved, during which they devote their entire time to practical anatomy and are required to dissect and demonstrate at least a complete lateral half of the human body. The supply of dissecting material is adequate, and the methods and facilities for preparing and preserving it are modern and of the best.
Methods of Instruction

The Anatomical Museum contains a large number of dry preparations, specimens, casts and models, including Auzoux’s complete model of a man, the gift of Hon. John Fremont Hill, ex-Governor of the State of Maine and an alumnus of 1877. The museum is rich in osteological material, and disarticulated skeletons are loaned to the students of the first year, remaining in their possession until the end of the term.

At the end of each year students are required to pass a written and an oral examination. Practical examinations in the identification of gross and microscopic structures are held in the laboratories.

Physiology. Instruction in this department is conducted with reference to the practical application of the facts of human physiology to the needs of the student, in his study of the diagnosis and treatment of disease. Class-room demonstrations and experimental laboratory teaching are employed, so far as they can be made to serve this purpose.

The instruction will be given by practical laboratory work, text-book recitation and supplementary lectures.

The laboratory is fully equipped with the Harvard apparatus.

The work of the first year will be devoted to study by recitation, and by practical laboratory exercises, extending over half the term, of the functions of Nutrition. Special attention will be given to the Physiology of Nerve and Muscle, of the Blood, including its microscopical study, Digestion and the phenomena and physics of the Circulation and Respiration. Students will be taught to demonstrate for themselves the essential facts connected with these functions.

Written reviews will be held from time to time besides regular quizzes upon both the didactic and laboratory work.

The work of the second year will be devoted to the study of Reproduction, the Nervous System, the Special Senses and the physiology of Voice and Speech.

The department is well equipped with charts, models and apparatus for demonstration and experimental work, admirably adapted to aid in giving students a thoroughly practical course in Physiology. There will be not less than seventy-five hours devoted to experimental and demonstration work in laboratories.

A laboratory fee of $2.00 is charged, to defray cost of material,
Medical School of Maine

which must be paid in advance at the Dean’s office before beginning
the laboratory course. Students furnish at their own cost necessary
instruments for nerve-muscle dissection, and are charged extra with
the cost of any injury to apparatus.

Chemistry. The chemical courses extend over the first two years.
They consist of lectures and laboratory work occupying from five to
nine hours per week for each class. As a knowledge of general inor-
ganic chemistry is required for admission, first-year men begin with
the application of general chemistry to the qualitative analysis of sim-
ple substances. The work is mainly in the laboratory, the book used
being Tower’s “Qualitative Chemical Analysis.” This is followed by
the principles and practice of quantitative analysis, especially volum-
metric. Particular attention is paid to the preparation of solutions of
definite strength and to the computation of results. The analytical
courses take the first half year.

The second half year with the first-year men is given to general
organic chemistry. Attention is given to the important classes into
which organic compounds are divided and to properties and reactions
common to the whole class, rather than to specific compounds and
special reactions. The compounds chosen to illustrate each class are,
as far as possible, those of importance to the physician. The course
is given mainly by lectures with some laboratory work in the prepara-
tion of certain organic compounds. The book used is Moore’s “Out-
lines of Organic Chemistry.”

The second-year men begin with physiological chemistry, using
Hawk’s “Practical Physiological Chemistry.” The work is mainly in
the laboratory, supplemented by assigned readings and quizzes. This
is followed by urinary analysis, the analysis of foods, detection of
poisons, and the analysis of drugs and medicines.

The aim is to make the chemical courses as practical as possible.
To this end the student is taught how to construct apparatus and pre-
pare reagents as well as use them. Particular attention is given also
to the literature so that a man may become familiar with the standard
works of reference in each department. The facilities afforded by the
Searles Science Building make it possible to do this to an unusual
degree.

Students who have completed in other schools courses of instruc-
Methods of Instruction

tion equivalent to the above may, upon examination, be excused from any of them.

Each student is required to pay in advance at the Dean's office a laboratory fee, covering the average cost of chemicals, gas and water. This is $3.00 for the first-year men and $2.00 for the second. In addition each pays for apparatus broken or not returned at the end of the term.

Obstetrics. Instruction in this department is given by lectures and recitations. The instructor in Obstetrics demonstrates for the class, in sections, work on the manikin; the diagnosis of position and presentation, the mechanism of normal labor; the manœuvres necessary in the delivery of abnormal cases, version and application of forceps. Each member of the class will have a chance to perform these various manipulations.

During the past year clinics were held at the Maine General Hospital, the Eye and Ear Infirmary and the City Hospital. Through the courtesy of the City Physician and other practitioners all the students were granted the opportunity of assisting at individual cases.

Internal Medicine. Instruction in this department continues throughout the third and fourth years. The whole of the third year is devoted mainly to the study of Diagnosis. The remaining weeks of the course include consideration of special diseases following the order usually found in standard text-books. The fourth year comprehends the study of special diseases.

During both years class-room instruction is given didactically and by means of regular recitations.

Clinics are held at the Maine General Hospital and at the Portland Charitable Dispensary upon Mondays, Tuesdays, Wednesdays, Thursdays and Fridays.

Care is taken to afford the students opportunities for personal examination of cases with the prominent object of having them become familiar with physical signs.

At the Maine Eye and Ear Infirmary the students of this school are offered the opportunity of attending the clinics as often and as frequently as time will allow them to do so. Cases may be seen here which pertain to internal medicine.
Medical School of Maine

Excellent opportunities for physical examination of the lungs are afforded to sections of the senior class each week at the Portland Tuberculosis Class.

It is hoped that material of the City Hospital and patients out of the hospital, under the care of the City Physician, may be made available during the coming year.

Pathology, Bacteriology and Hygiene. Instruction in this department is given during the first, second and third years by lectures, recitations, demonstrations and laboratory work. Laboratory courses of the first and second years are given in the pathological laboratory in Seth Adams Hall. The course in clinical pathology is given in the laboratory at the school building in Portland and at the laboratories of the Maine General Hospital, Maine Eye and Ear Infirmary, Children’s Hospital and Portland Charitable Dispensary.

Instruction is divided into five courses.

1. Hygiene. This course is given to first-year students during the last half of the year, and occupies five hours a week for nine weeks. Eighteen of the hours are didactic and twenty-seven are laboratory hours. The laboratory work includes an introduction to bacteriology, microscopic study of foods, practical disinfection, and routine examination of water and milk.

2. Bacteriology. This course is given to second-year students and occupies fourteen hours a week from the beginning of the term until the Christmas recess. Students are required to prepare most of the solutions and media used in this course. Each student is required to cultivate upon media twelve varieties of pathogenic bacteria and to study their characteristics. Animal inoculations and autopsies are performed by the students. Special attention is given to the laboratory diagnosis of tuberculosis, diphtheria and typhoid fever.

3. General Pathology, including Pathological Histology. This course is given to second-year students. Instruction occupies fourteen hours each week and lasts from Christmas to the April recess. McFarland’s text-book is used as a basis for this course. The textbook is supplemented by lectures on special subjects. As far as possible the consideration of a subject in the class-room is followed by a study of the same subject in the laboratory. During the latter part of the course much time is given to diagnosis work upon microscopical preparations.
Methods of Instruction

4. Blood Examination. This is a short course given to second-year students during the last week in May and the first week in June. Students are trained in counting the red and white corpuscles, in estimating the amount of hemoglobin, in preparing and examining fresh and stained specimens.

5. Clinical Pathology. This course is given to third-year students. It includes instruction given as opportunity occurs at surgical clinics and autopsies and a forty-five-hour course at the school laboratory in Portland. In this course each student examines microscopically tissues and other pathological material obtained at the Maine General Hospital, Maine Eye and Ear Infirmary, Children's Hospital and Portland Charitable Dispensary. Whenever possible, students are required to obtain the material from the patients.

Arrangements have been made with Maine General Hospital, Maine Eye and Ear Infirmary, Children's Hospital and Portland Charitable Dispensary for third-year students to do pathological work in these institutions. Regular assignments are made and reports of work done required. By arrangement with the physicians in charge special attention is given to the clinical side of this work.

The course in Clinical Pathology occupies at least ninety hours. Of these only forty-five are scheduled.

Surgery. The instruction in surgery is given by lectures, recitations, demonstrations, clinics, diagnosis exercises on the patient and operations on the cadaver. It extends throughout the third and fourth years of the course, and in the highest possible degree is practical in character.

In the didactic course the recitation method is employed for the most part, as being particularly helpful to the students,—necessitating careful preparation of each lesson, allowing no essential point to be slighted, and stimulating pride by the certainty of each that his work will be compared with that of his fellows. But the lecture method is used whenever it seems serviceable, as in the introduction of new topics, the presentation of the salient features of unfamiliar subjects, and the explanation or amplification of matters not adequately treated in the text-book.

The students perform a large variety of operations upon the cadaver, under the immediate direction and supervision of the teacher.
application of bandages and other dressings is taught in the most practical manner.

The principal clinical teaching is given at the Maine General Hospital by the six visiting surgeons, all of whom are professors, assistant professors or clinical instructors in the School. Twice in each week some of these teachers hold exercises in diagnosis, in which the students are instructed in proper methods, and privileged to make personal examination of cases. Sections of the class are taken in turn through the wards, and are given opportunities for the observation of the after-treatment and progress of patients upon whom they have seen operations performed. A system of notification by telephone enables the students to obtain prompt information of accident cases which are brought into the Hospital. The amount of clinical material at this institution far exceeds the capacity of the classes to appropriate it without neglecting other and essential studies. The surgeons of the Portland Charitable Dispensary permit sections of the class to observe cases at their daily service—a privilege highly valued and constantly accepted, as the kind of diseases is largely different from those usually seen at the Hospital. The City Hospital also occasionally presents interesting and useful material.

**Materia Medica, Pharmacology and Therapeutics.** Instruction in this department is as follows:

In the first half of the third year there is a recitation course in Pharmacology. This gives the student a general idea of the action of the more important drugs. During the first half of this year a laboratory course of sixty hours is given. In this are taken up Botany, Plant Chemistry, the manufacture of pharmaceutical preparations and the study of incompatibles.

The last three-fourths of the laboratory course will be devoted to experimental pharmaco-dynamics. The students will perform experiments, either individually or in groups, upon living animals. These experiments will give the student a first-hand knowledge of the action of the important drugs.

In the second half of the third year the more systematic study of drugs will be begun. The instruction will be by lectures and quizzes and will include a description of the doses and preparations of drugs, their action in health and disease, their incompatibilities and the uses
Methods of Instruction

which are made of them in the treatment of disease. Early in this course will be given instruction in Prescription Writing and there will be constant drill on this difficult subject till the end of the fourth year.

In the first half of the fourth year this course will be continued. The last half of the year will be devoted to Therapeutics or the treatment of diseases. This will be largely a text-book course with occasional lectures.

The total number of hours of instruction in this department is 240.

Medical Jurisprudence. The instruction in Medical Jurisprudence in a course of fifteen lectures followed by an examination is directed mainly to an exposition of the legal duties and responsibilities of physicians and surgeons to their patients and also to their character and position as medical expert witnesses in Courts of Justice. Practical suggestions are given for guidance in both respects.

Gynecology. The course in Diseases of Women continues through the third and fourth years. By a new arrangement third-year students have work mainly didactic in character.

Dr. W. Bean Moulton conducts in the fourth year a course in the Pathology of Diseases of Women.

There are also weekly clinics for fourth-year students, at which the examination of female patients is an important feature.

Diseases of Children. Instruction is given, as heretofore, by recitations, lectures, clinical demonstrations, and study of cases by individual students with reports and discussions by members of the class. During the past year clinical opportunities have been furnished by the Children's Hospital, the Female Orphan Asylum, the St. Elizabeth's Orphan Asylum, the Holy Innocents' Home, the Portland Charitable Dispensary, the Maine General Hospital, the Maine Eye and Ear Infirmary, the Maine School for the Deaf, and by the City Physician of Portland and by other practitioners, from their private practice.

Ophthalmology and Otology. The instruction in these departments will be given by lectures and clinics. A weekly clinic is held at the Hospital on Saturday, at 8.30 A.M. The various diseases are described as cases illustrating them are available for demonstration;
operations are performed when required; and other treatment applied as may be necessary.

Daily clinics are also held at the Portland Charitable Dispensary and the Maine Eye and Ear Infirmary, to which the students have access.

**Public Hygiene.** Instruction is given by the Professor of Physiology, who is a member of the State Board of Health, in the form of lectures upon the principles of Public Sanitation, considering the source and character of public water supplies and the collection and disposal of waste, with special reference to preventable diseases.

Several hours are devoted to sanitary legislation and the relations and obligations of the practising physician to the public and to health boards, in the management of infectious diseases.

**Neurology and Mental Diseases.** Instruction in Neurology and Mental Diseases is given to the fourth class each week throughout the year by lectures, clinics and quizzes, three hours of each week being devoted to such instruction.

**Genito-Urinary Surgery.** Instruction, both didactic and clinical, in Genito-Urinary Surgery is given to the fourth class each week during the year.

**Dermatology.** Instruction in Dermatology is given to the third-year class each week during the entire year didactically and clinically.

**Orthopedic Surgery.** Clinics in Orthopedic Surgery are held at the Maine General Hospital and the Children's Hospital on each Friday throughout the fourth year.

**Diseases of the Nose and Throat.** The fourth class receives special instruction, both didactic and clinical, in Diseases of the Nose and Throat, weekly throughout the year.

The total number of hours in the foregoing schedule aggregates 4,291. These hours are divided among lectures, laboratory and clinical work in such a way as to conform as nearly to the recommendations of the Association of American Medical Colleges as conditions will allow.
Text-Books

THE LIBRARY

The Library of the Medical School, containing over 5,000 volumes, has been combined with that of the College, which numbers over 93,000 volumes. Both collections are under the same administration and are at the service of the medical students. The more recently published medical works and current numbers of professional journals are kept in a separate place in the main reading room for their especial use. It is not the policy of the school to furnish text-books through its library, or to buy largely in medical literature; yet, by means of the catalogue of the Library of the Surgeon-General’s Office and the system of inter-library loans, the Librarian is able to procure for use in serious investigation almost any book that may be desired.

Text-Books

PHYSIOLOGY. For recitation work, Brubaker’s Text-Book of Physiology. For reference, Landois, Howell’s American Text-Book of Physiology, Ott’s Text-Book of Physiology. For Laboratory, Hall’s Experimental Physiology. For reference, Porter’s Introduction to Physiology and Sterling’s Practical Physiology.

CHEMISTRY. For class use, Tower’s Qualitative Chemical Analysis, Moore’s Outlines of Organic Chemistry, Hawk’s Practical Physiological Chemistry. For reference, Treadwell’s Qualitative Analysis; Holleman’s Text-Book of Organic Chemistry; Richter’s Organic Chemistry; Long’s Text-Book of Physiological Chemistry; Abderhalden’s Text-Book of Physiological Chemistry; Holland’s Medical Chemistry and Toxicology; Tyson’s Practical Examination of Urine; Ogden’s Clinical Examination of the Urine; Blythe’s Detection of Poisons; Peterson and Haines’s Legal Medicine and Toxicology; Leach’s Food Inspection and Analysis; Mason’s Examination of Water; Nelson’s Introduction to the Analysis of Drugs and Medicines.
Medical School of Maine

PUBLIC HYGIENE. For reference, Harrington, Coplin and Bevan, Parke’s Practical Hygiene, Abbott’s Hygiene of the Transmissible Diseases.

PRACTICE OF MEDICINE. Osler, Edwards, Tyson, Hare.

DIAGNOSTIC METHODS. Sahli.

PHYSICAL DIAGNOSIS. Dacosta, Cabot, Greene.

BACTERIOLOGY. For reference, Abbott, McFarland, Park, Williams.

PATHOLOGY. For recitation, McFarland. For reference, Adami, Ziegler, Delafield and Pruden, Coplin, Green.

CLINICAL PATHOLOGY. For reference, Mallory and Wright, Lenhartz-Brooks, Wood, Stett, Todd.

OBSTETRICS. Williams, Webster, Edgar, Hirst, Reynolds and Newell.

DISEASES OF WOMEN. Dudley, Penrose, Reed, Kelley (2 vols.).

DISEASES OF CHILDREN. Holt, Rotch, Williams.

MEDICAL JURISPRUDENCE. Taylor with Bell’s Notes, Ewell.

DISEASES OF THE EYE. Nettleship, Swanzay, DeSchweinitz.

DISEASES OF THE EAR. Bacon, Field.

NEUROLOGY. Dana, Church, Peterson, Starr.

DERMATOLOGY. Van Harlingen’s Diseases of the Skin, Shamberg’s Diseases of the Skin.

ORTHOPEDIC SURGERY. Bradford and Lovett.

GENITO-URINARY SURGERY. Morton, Keyes, Casper.

NOSE AND THROAT. Bishop, Knight, Kyle, Ballinger. For reference, L. Brown.

DICTIONARIES. Dorland Illustrated, Gould, Dunglison.
ALUMNI ASSOCIATIONS AND SPECIAL FITTING SCHOOLS
Alumni Associations

THE GENERAL ASSOCIATION

President, Franklin Conant Payson, A.M.; Vice-President, Charles Taylor Hawes; Secretary and Treasurer, George Thomas Little, Litt.D., Brunswick, Me.

ASSOCIATION OF BOSTON

President, Daniel O. S. Lowell, Litt.D.; Secretary, Alfred B. White, 85 Devonshire Street, Boston, Mass.

THE BOWDOIN CLUB OF BOSTON

President, Francis L. Banfield, M.D.; Secretary, George C. Purinton, Jr., 120 Boylston Street, Boston, Mass.

ASSOCIATION OF NEW YORK

President, George Frank Harriman; Secretary, Joseph Banks Roberts, 2 Rector Street, New York City.

ASSOCIATION OF WASHINGTON

President, *Hon. Melville Weston Fuller, LL.D.; Recording Secretary, Rev. Frank Sewall, D.D.; Corresponding Secretary, Roscoe Henderson Hupper, Library of Congress, Washington, D.C.

* Died, July 4, 1910.

ASSOCIATION OF PORTLAND

President, Hon. Augustus Freedom Moulton, A.M.; Secretary, Hon. Percival Proctor Baxter, 655 Congress Street, Portland, Me.

ASSOCIATION OF OXFORD COUNTY

President, Hon. Addison Emery Herrick, A.M.; Secretary, Frank Kimball, Norway, Me.

KENNEBEC ALUMNI ASSOCIATION

President, Oscar C. S. Davies; Secretary, Blaine S. Viles, Augusta, Me.

BANGOR ALUMNI ASSOCIATION

President, Franklin Augustus Wilson, A.M.; Secretary, Bertram Lewis Bryant, A.M., M.D., Bangor, Me.

ASSOCIATION OF PROVIDENCE, R. I.

President, Frank Herbert Swan; Secretary, Alfred Perley Ward, 76 Dorrance Street.

ASSOCIATION OF AROOSTOOK COUNTY

President, Hon. Frederick Alton Powers, LL.D.; Secretary, Roland Eugene Clark, Houlton, Me.

ALUMNI RECORD

It is desired to keep as full a record as possible of the residences, occupations, and public services of the alumni. Information is solicited in regard to these points, and also in regard to matters appropriate to the obituary record annually published by the college. Communications should be addressed to the College Librarian.
Special Fitting Schools

The schools noticed on the following pages have been constituted special Fitting Schools for Bowdoin College by the action of their several Boards of Trustees, in concurrence with the College Boards. They are annually examined by representatives of the college. Graduates of the schools, however, are required to pass the regular college entrance examinations for admission, at the same dates and under the same conditions as are prescribed for students of other preparatory schools, unless the school is approved by the New England College Entrance Certificate Board.

FRYEBURG ACADEMY
Fryeburg, Me.
Incorporated February 9, 1792.
Ridgley Colfax Clark, A.B., Principal.

This school offers five courses of study, of four years each:
I. A Classical College Preparatory Course.
II. A Scientific College Preparatory Course.
III. A Business Course.
IV. A Manual Training Course.
V. An Agricultural Course.

The Academy is on the approved list of the New England College Entrance Certificate Board.

EXPENSES

Tuition. The cost of tuition is $10.00 per term for all branches, drawing, painting, manual training and laboratory fees included.

Board. The cost of board in the dormitories is $4.50 a week, including heating and lights.
Bowdoin College

CALENDAR

Fall Term of 13 weeks began September 20, 1910.
Winter Term of 13 weeks begins December 27, 1910.
Spring Term of 11 weeks begins April 4, 1911.
Examiner appointed by the college for 1910-1911: Professor Files.

WASHINGTON ACADEMY

East Machias, Me.

INcorporated March 7, 1792.

RALPH STANLEY SMITH, A.B., Principal.

This Academy offers three courses of study:
I. A College Preparatory Course of four years.
II. A Scientific Course of four years.
III. An English-Commercial Course of four years.
The Academy is on the approved list of the New England College Entrance Certificate Board.

EXPENSES

TUITION. The tuition fee is $8.00 a term, and covers all expenses for laboratory and commercial equipment. Vocal music and elocution are offered free to all students.

BOARD. The cost of board and room is from $3.50 to $4.00 per week. Rooms can be obtained at very low rates by students who wish to board themselves.

CALENDAR

Fall Term of 14 weeks began September 5, 1910.
Winter Term of 12 weeks begins December 27, 1910.
Spring Term of 12 weeks begins March 27, 1911.
Examiner appointed by the college for 1910-1911: Professor Ham.
Special Fitting Schools

LINCOLN ACADEMY
Newcastle, Me.

INCORPORATED FEBRUARY 23, 1801.

HENRY K. WHITE, A.M., Principal.

This school offers three courses of study:
I. A College Preparatory Course, of four years.
II. An English and Business Course, of four years.
III. Teacher's Training Course, of four years.

The academy is on the approved list of the New England College Entrance Certificate Board.

EXPENSES

TUITION. The cost of tuition is $10.00 per term.
BOARD. Board can be obtained at from $3.00 to $4.00 per week. Rooms for self-boarding may be secured at reasonable rates.

CALENDAR

Fall Term of 14 weeks began September 12, 1910.
Winter Term of 13 weeks begins January 3, 1911.
Spring Term of 11 weeks begins April 10, 1911.

Examiner appointed by the college for 1910-1911: Assistant Professor Nixon.

THORNTON ACADEMY
Saco, Me.

INCORPORATED FEBRUARY 16, 1811.

ERNEST ROLISTON WOODBURY, A.M., Principal.

This academy offers four courses of study, of four years each:
I. A Classical College Preparatory Course.
II. A Scientific College Preparatory Course.
Bowdoin College

III. An English Course.
IV. A Business Course.

The academy is on the approved list of the New England College Entrance Certificate Board.

EXPENSES

TUITION. Tuition in each course is $10.00 a term, payable in advance. Those desiring to take special studies will be charged $5.00 a term for each study.

BOARD. Board can be obtained in the city at from $4.00 to $6.00 a week.

BOOKS. Students not residents of Saco must purchase their own books.

CALENDAR

Fall Term began September 13, 1910.
Winter Term begins January 3, 1911.
Spring Term begins April 4, 1911.
Fall Term begins September 12, 1911.

Examiner appointed by the college for 1910-1911: Professor Mitchell.
